Edgardo M. Latrubesse

EDUCATION

- National University of San Luis, Argentina, BSc. in Geological Sciences, 1989.
- National University of San Luis, Argentina, PhD. in Geological Sciences, 1992 (max. qualifications/honors). Thesis**:** The Quaternary fluvial record of the Purus River basin, Acre State, Amazon basin, Brazil. Advisor: Dr. Martín Iriondo, CONICET, Argentina (vice-president of INQUA-International Union for Quaternary Research, 1995-1999).

FIELDS OF RESEARCH AND PROFESSIONAL INTEREST

Geomorphology, fluvial geomorphology and sedimentology, river management, Quaternary studies of tropical, sub-tropical and temperate/semiarid environments including large aeolian systems and fluvio-aeolian interactions, geo-ecology, geomorphology and global changes, theoretical geomorphology, reorganization of large fluvial systems during the Neogene in response to Andean tectonic, environmental approaches focusing the interaction between biotic and abiotic components and human impacts on physical geomorphic processes, natural hazards.

PROFESSIONAL APPOINTMENTS

Current

Associate Professor, The University of Texas at Austin, Department of Geography and the Environment.

Affiliate Faculty of LLILAS - Teresa Lozano Long Institute of Latin- American Studies-The University of Texas at Austin.

Affiliate Faculty of the Environmental Sciences Institute, The University of Texas at Austin.

Prior Employment

2008-2009 - Thomas W. Rivers Distinguished Visiting Professor in International Affairs, Department of Geological Sciences, East Carolina University-ECU, Greenville, NC, USA.

2007-2009 - Director/Chair, Laboratory of Tritium and Radiocarbon-LATYR- CIG-CONICET-National Council of Research and Universidad Nacional de La Plata and researcher of CONICET, National Council of Research, Argentina.

2006-2009 - Full Profesor, Universidad Nacional de La Plata, Argentina, Centro de Investigaciones Geológicas-CIG, La Plata, (Bs. As)-Argentina and researcher of CONICET, National Council of Research, Argentina.

2002-2006 - Scientific and administrative responsible for the collaboration program between University of Modena-Italy and Federal University of Goias-Brazil.

2001-2003 - Vice-Head and Co-Founder, Ph.D. Multidisciplinary program in Environmental Sciences, Federal University of Goias, Brazil.

1998-2006 - Federal University of Goias, Associate Professor, Institute of Social and Environmental Sciences, Department of Geography (Master and undergraduate courses), and PhD multidisciplinary Course in Environmental Sciences, Brazil.

1998-2006 - Head and Founder, Laboratory of Geology and Physical Geography-LABOGEF, Federal University of Goias, Brazil.

1994-1998 - Head and Founder, Laboratory of Geomorphology and Sedimentology, Federal University of Acre, Brazil

1994-1998 - Contracted Foreign Professor, Federal University of Acre, Department of Geography, Rio Branco, Brazil.

1991-1993 - Contracted Foreign Professor, Federal University of Amazonas, Department of Geography, Manaus, Brazil.

1986-1990 - Teaching Assistant, Department of Geological Sciences, National University of San Luis, Argentina.

FIELD WORK (WITH PUBLISHED DATA)

Argentina, Brazil, Bolivia, Paraguay, Guyana, Perú, Colombia and Venezuela.

LANGUAGES

Fluent in English, Spanish, Portuguese and Italian.

PUBLICATIONS

Edited Books – Journals

Forthcoming

Abad, J., **Latrubesse, E**., Lanzoni, S. (Guest Editors) (special issue accepted, contract provided). Fluvial morphodynamics and channels patterns, *Earth Surface Processes and Landforms*.

Wilkinson, J. **Latrubesse, E.**, Abad, J. (Guest Editors) (special issue accepted, contract provided). Megafans and large rivers morphodynamics and sedimentology. *Sedimentary Geology*.

Latrubesse, E. *The Physical Nature of the Amazon Basin: Quaternary history, geomorphology, hydrology and related environmental aspects*. Elsevier, UK (book, approved for edition by Elsevier, contract provided).

Latrubesse, E., Stevaux, J.C. and Young, K. (Guest Editors). Abiotic controls in South American Riverine wetlands. *Journal of South American Earth Sciences*, (advanced, several papers already available on line).

Published

1. Sinha, R., **Latrubesse, E.** and Nanson, G. (Guest Editors). The Quaternary of tropical and subtropical rivers. *Palaeogeography, Palaeoclimatology Palaeoecology*, 356-357, 108p.

GRANTS AND AWARDS

PENDING RESEARCH GRANTS AND AWARDS

- National Science Foundation- (PI)-Collaborative Research: Cenozoic Geological Investigations of the Amazon River, Brazil, Manaus to the Atlantic. UT budget: $120,836; Total budget: $420,000

FUNDED RESEARCH GRANTS AND AWARDS

Remember that in Argentina and Brazil, funding for students fellowships are not included in the project budget but provided through specific grants. That means, the amounts by project listed below from Brazil and Argentina are specific for supporting research (net-funding free of indirect costs) and not related to grant/contracts for students, overhead and other indirect costs.

- Small Grants Program, Office of Research, Univ. of Pittsburgh (Co-Pi)- Morphodynamics of the Madeira River: a crucial Amazonian anabranching megariver facing imminent disruption, 2012-2013; $16,00
- National Science Foundation. (PI) - Morphodynamics of an Amazon megariver facing disruption: The Madeira. UT budget $72,00; total budget ~$100,000, 2012-2013
- National Council of Brazil-CNPq-CAPES- Without Frontiers Program- (Foreign Co-PI)- Deciphering morphogenetic mechanisms in mega-rivers: the role of the Brazilian systems in the new fluvial geomorphologic paradigms. 2-12-2015- $260,000
- Mellon Research Travel Grant, LLILAS, UT Austin - Gold mining in the Madre de Dios basin, Peru: geomorphologic changes and social conflicts in the most impacted area by mining in the whole Amazon basin, 2012, $4,500
- National Geographic Society. (PI) - Exploring a soon to be lost Amazon world: a geomorphologic, paleontologic and geo-archaeologic expedition to the Madeira River, 2011. $19,900
- Mellon Research Travel Grant, LLILAS, UT Austin - Was the 2009 the largest or the most hazardous flood recorded in the Amazon basin? Peculiarities of a complex system 2010-2011. $4,884
- University of Texas-Liberal Arts-Department of Geography and the environment - Start – up money. 2009-2011. $150,000
- College of Engineering, university of El Litoral- FICH-UNL, Argentina. Co-PI- Assessment of changes and sedimentation of the Parana Rivers near Santa Fe: implications for the territorial development. 2011 – 2013. $ 13,450.
- Secretary of Science and Innovation, Santa Fe State, Argentina. Co-PI. Assesment of hydrogeomorphologic processes of the Parana River between Arroyo Leyes and Santa Fe –Paraná. 2010 – 2012. $ 6850.
- FICH-UNL, Argentina. Co-Pi. Analysis of the constructional processes in a large alluvial river: The middle Parana. 2009 – 2012. $8000.

- Mellon Research Travel Grant, LLILAS, UT Austin - Hyper-avulsive rivers in the Chaco plain and strategies for river management (2009-2010). $ 4925
- CNPq 482545/2007-0. (PI) - Hydro-physics impacts induced by human action (direct and indirect) and by climatic changes in large Brazilian Rivers: The extreme cases of Rio Araguaia and Rio Parana-ARPA. 2008-2009. $ 87,000
- Pro-Sul Network CNPq 490602/2007-0-I. Chair of the Argentinean Team (UNLP) in the research Network - Hydro-physic response to Global Change in large rivers of South America: Parana, Paraguay, Orinoco and Magdalena Rivers (Brazil, Argentina, Colombia and Venezuela). 2007-2010. $ 60,000.
- NASA-USA, Earth Science Enterprises, 2700-0087. (Brazil PI) - Land use Impacts on the Water Resources of the Cerrado Biome. In collaboration with Woods Hole Research Center, University of Stanford, University of Goias (Brazil) and University of Brasilia (Brazil). 2006-2008. Latrubesse's team: ~$ 70,000
- Fundação de Amparo a Pesquisa do Estado de Sao Paulo-FAPESP, Brazil. Visiting Foreing Scientist. University of Guarulhos-UnG - Master degree program in Geo-environmental Analysis. June 1st to July 31, 2008. $ 12,000.
- PI-Head- Program of Science and Technology for the Development in Ibero-American countries CYTED - Abiotic Control of wetlands: comparison and assessment of methods and techniques of mapping and monitoring of vegetation units-CABAH network. 2003-2007. $ 155,000.
- FEMA-Goiás, Brazil. (PI) - Quantification of the erosion and deposition processes in the middle Araguaia alluvial plain, Brazil. 2003-2004. $15,000
- European Commission, INCO Program. Chair of the Brazilian team. Quantitative indicators and indices of environmental quality; Euro-Latin American Network for Environmental Assessment and Monitoring (ELANEM)-INCO Program. Universities: Baja California (Mexico); Central de Las Villas (Cuba); Federal of Goias (Brasil); National of Río Cuarto, National of La Plata (Argentina); Concepción (Chile); ITC (Netherland); Cantabria (Spain); Modena and Reggio-Emilia (Italy). 1999-2003**.** Total project amount: Euros 810,000. Latrubesse´s team amount: US$ 83,000.
- CNPq–Brazil (PI) - Present day morpho-dynamic and Quaternary evolution of the Araguaia Alluvial plain: its environmental implications - Brazil. Duration: 2000 – 2002. $ 24,000
- VITAE Foundation. (PI). - Risks associated to thalweg shift in the Araguaia (Brazil) and Parana (Argentina) rivers: its importance for fluvial engineering and bi-national programs of integration. Participants: Researchers from Federal University of Goias, of Maringá (Brazil) and National del Litoral–Santa Fé (Argentina). Duration: 2000-2001. $ 18,000.
- CNPq- (PI) Morphodynamics and Quaternary evolution of the Araguaia alluvial plain: environmental implications. 1999-2001. $30,000
- UFAC- CNPq-PI Geomorphology and Quaternary of the Acre River floodplain. 95-97.$26,000
- INQUA-International Union for Quaternary Research-Travel Grant. INQUA Congress Berlin, Germany, 1995. $2500

- CNPq- 502721/91- Quaternary of the Rio Negro floodplain from Santa Isabel to the mouth: Geomorphology, stratigraphy, paleaeoecology and neotectonics.1991-1993. $25.000
- UFAM-CNPq. (PI) Fluvial dynamics of the Solimões River between Careiro and Paciencia islands. 1991-1993. $12,000.
- UFAM- (PI) Geomorphology and Quaternary of the Rio Negro-Amazon confluence. 1992-1993. $6000
- PID-CONICET 3-095100/88 and National Geographic Society (collaborator) Geomorphologic map of the South American plains.
- CONICET-Argentina-Graduate Research Fellowship Program. Project: Geomorphology and Quaternary of the Pilcomayo megafan (Bolivia, Paraguay and Argentina). 1990-1991. 15,000
- Antorchas Foundation Travel Grant. IGCP 281 Unesco Project meeting, Colombia. 1990. $2000
- UNSL-Sc.& Tech. (Co-PI). Geomorphologic map of the San Luis Province, Argentina. 1989-1991 $15,000
- UNSL-Sc. & Tech. Graduate Research Fellowship Program. Geomorphology and Quaternary of Saladillo region, San Luis province, Argentina. 1989-1990. $14,000

SPECIFIC PROJECTS FOR ACQUISITION OF EQUIPMENT

- UT-LabSpace Program, Improvements to the Environmental Change Laboratory, space Environmental change Lab; 2012, $9350
- CT-INFRA-FINEP - phases 1 and 2. Acquisition of an acoustic doppler ADCP Rio Grande, a geodesic DGPS, a video-system for microscopy, automatic data logging station. (2003-2004). $ 72,000.

OTHER GRANTS AND PROJECTS OF RESEARCH WITH EXTERNAL FINANCIAL SUPPORT

- Collaborator- HIESA-Spatial Hydrology of the Amazon, project, founded by FINEP-Brazil and managed by UFAM, Brazil. ($900,000) (ongoing- 2011-2013)
- Collaborator-Sao Francisco River, Brazil. Geological characterization of the continental shelf and the influence of fluvial sources in NE Brazil (SE and AL States), UFS-PETROBRAS- FAPESE. (2010-2011), $1,200,000
- Consultant of the Project Modeling of hydro-geomorphologic processes and parameter to assess ecologic sustainable discharges in the São Francisco River, Brazil. CT Hidro-CNPQ. 2007-2009. $350,000.
- Consultant to the project Dynamic of bed load in the Parana River and in the mouth of main tributaries, Brazil. CNPq-Brazilian Council of Research. $20,000. (J.C.Stevaux-PI-University of Guarulhos-Brazil). 2006-2007.
- Consultant to the project Transmission of the impacting wave in the dynamics of flow and bed load of the Paraná River: model for management of large alluvial systems

affected by dams, waterways and mining. FAPESP-Fundation of Research of São Paulo State, Brazil, $35.000. (J.C. Stevaux-PI- University of Guarulhos). 2006-2007.

SPECIAL PARTICIPATION IN SCIENTIFIC MEETINGS (only included invited talks, chaired sessions and other special participations).

- Invited researcher, Catalysis workshop on The Role of Mountains, Climate, and Landscape in Generating Amazon/Andean Biodiversity, National Evolutionary Synthesis Center (NESCent), NSF-Duke University, Durham NC, October , 2012.
- Invited talk, University of Pittsburgh Department of Civil and Environmental Engineering, October 2012.
- Invited speaker, 45 Brazilian Symposium on Geomorphology, Rio de Janeiro, Brazil, October, 2012
- Invited speaker, Argentinean Congress on Geomorphology and Quaternary, Rio Cuarto, Argentina, October 2012.
- Invited speaker. American Geophysical Union-AGU Fall Meeting, Session 012, Large fans as mesoscale landforms, San Francisco, December, 2011.
- Invited researcher. Catalysis Meeting Earth surface processes in the evolution of mammalian tooth shape at The National Evolutionary Synthesis Center (NESCent) NSF-Duke University (this meeting enclosed 20 specialists from different disciplines from USA, Europe and New Zealand). Durham, NC, April, 2011.
- Invited talk. The future dark of the Brazilian Rivers, Brazil, Brazilian Center-LLILAS, UT at Austin, April 2011.
- Invited speaker. International Conference on the Status of the World's Large Rivers, Vienna, Austria, April, 2011.
- Invited talk. The Quaternary paleoecology and paleogeography of the Amazon basin, Texas A&M, Department of Geography, March, 2011.
- Invited speaker. AGU, San Francisco Fall 2010, USA, Large rivers morphodynamics session, December 2010.
- Invited speaker (plenary talk). 45th Geological congress on Geology, Belem, Brazil, October, 2010).
- Invited speaker. Binghamton Symposium on fluvial Geomorphology, University of Texas-Austin, October 2008.
- Invited speaker, (Plenary lecture). Geomorphology of large South American Rivers, VII SINAGEO, National Symposium on Geomorphology, and II Second Latin American Meeting of Geomorphology, Brazilian Union of Geomorphology-UGB, Belo Horizonte, August, 2008.
- Invited speaker. Seminar on Impact of the global climate change on Manaus and Rio Negro basin, Amazonia. Socio-Environmental Institute-ISA, Manaus, March 2008.

- Invited speaker. Paleohydrology of the Amazon basin, ABEQUA Congress, Brazilian Union of Quaternary Research, Belem, Brazil, November 2007.
- Invites speaker. Anabranching patterns: the ultimate fluvial response of channel adjustments in large rivers. International workshop Morphodynamic in large lowland rivers, FICH/Argentina and NCESD-USA, Santa Fe, Argentina.
- Invited speaker. The Amazon Basin Floodplains. Symposium on Geotechnologies applied to floodplain studies, PROVARZEA-IBAMA, Manaus, July, 2008.
- Chair of the session Aeolian landforms, International Regional Conference on Geomorphology-Internatinal Association of Geomorphologists, Goiania, Brazil, September 2006.
- Chair of the Session Fluvial Geomorphology, International Regional Conference on Geomorphology-International Association of Geomorphologists, Goiania, Brazil, September 2006.
- Invited Researcher. IGCP Meeting 518 and 50^0 CHINQUA Congress, Nanking, China, October, 2006.
- Member of the plenary rounded Table. The Tropics: past present and future International Regional Conference on Geomorphology-IAG, Goiania, September, 2006, shared with Michael Thomas (U. Stirling, UK) and J. Runge (U. Frankfurt, Germany).
- Chair of the session S2 Fluvial Systems, Land Degradation and River Management, International Symposium, COMLAND 2005,IUGS-International Commission on Land Degradation- Uberlandia, Brazil, May, 2005.
- Chair of the session The Late Cenozoic Fluvial Record, IGCP 449 Meeting, December 15-19, 2004, Málaga, Spain.
- Chair/organizer of the International Workshop on Late Cenozoic fluvial Sediments, IGCP 449. Latin-American Congress of Sedimentology, Belem do Para, June, 2003, Brazil.
- Chair of session GLOCOPH International Meeting on Global Continental Paleohydrology, December, 2002, Pune, India.
- Invited speaker, Plenary rounded table. Fluvial dynamic of the largest Brazilian rivers IV Simpósio Nacional de Geomorfologia, União da Geomorfololgia Brasileira,-UGB, São Luiz de Marañón,Brazil. October 29 to November 11, 2002.
- Invited speaker, rounded table and member of the scientific committee. XVIII Congreso Brasileiro de Paleontologia, UFAC, Rio Branco, August, 2001.
- Member of the Scientific Committe. Simpósio Nacional de Controle de Erosão. ABGE, Goiânia, May 3 to 6, 2001.
- Chair/organizer. Symposium S6, Large Rivers, IAG-International Conference on Geomorphology, Tokyo, Japan. September 2001.
- Chair of session, Third International Meeting on Global Continental Paleohydrology-GLOCOPH' 98, Kumagaya, Japan, September, 1998.
- Chair/organizer of the First South-American Symposium on Paleohydrology during the VI Congress of the Brazilian Association of Quaternary Research. Curitiba, Brazil, July, 1997.
- Selected paper for oral presentation in the Tropical Geomorphology Session, IV International Conference on Geomorphology-IAG, Bologna, Italy, August, 1997.

- Brazilian National Delegate. Annual Meeting, Proyect IGCP 341, Southern Hemisphere Paleo and Neoclimates, Tarija, Bolívia, May, 1996.
- Invited speaker, rounded table on Geomorphologic Mapping, First Brazilian symposium on Geomorphology, November 1996, Uberlândia, Brazil.
- Chair of the session Paleohydrological techniques and approaches for understanding the global change. Second International Meeting on Global Continental Palaeohydrology, GLOCOPH-INQUA, Toledo, Spain, September, 1996.
- INQUA Congress, Berlin Germany, August, 1995. Winner of a grant offered by INQUA to young scientists.
- Brazilian National Delegate, Second meeting IGCP 341 "Southern Hemisphere Palaeo and Neoclimates", September, 1994, San Rafael, Argentina.
- Chair of the session Tropical Quaternary of South America, 5th Meeting IGCP 281 "Quaternary Climates of South América" November, 1993, Santiago de Chile.
- Argentinean National Delegate Second Meeting Project IGCP-Unesco 281 Quaternary Climates of South América. Medellín, Colombia May, 1990.
- Argentinean National Delegate, First Meeting Project IGCP-Unesco 281 Quaternary Climates of South América. La Paz, Bolivia. May 14, 1989.

GRADUATE STUDENT SUPERVISION

In addition to UT support, grants for students were and still to be obtained through a variety of agencies such as Brazilian Council of Research-CNPq-Brazil, Brazilian agency for Graduate Programs-CAPES-Brazil, National Council of Research-CONICET-Argentina, NASA, European Union International Cooperation Program-INCO, among others. All the students listed below were supervised by Latrubesse.

Supervised Post-doctorate fellowships:

- Marchetti Zuleica, 2011-2013- Interactions among vegetation and morphodynamic processes in the Parana River floodplain, Argentina-Grant from CONICET- - Argentina.
- Aquino, Samia- 2007-2008. The Araguaia hydro-geomorphologic data-base. Grant of NASA-USA, Earth Science Enterprises, 2700-0087.

Supervised PhD Dissertations in Progress

- Robert Bean, PhD. 2012-present. UT Austin, Department of Geography and the Environment, starting in August.
- Fontes, Luiz. 2009-present. Morphodynamic adjustments of the lower Sao Francisco River and Coastal Hydro-geomorphologic Impacts, because of dam constructions, northeastern Brazil. State Univ. of Sao Paulo -UNESP, Rio Claro. PhD program in Geosciences, Brazil.
- Ramonell, Carlos. 2009-present.. Quaternary Paleohydrology of the Parana River Floodplain, Argentina. Geological Sciences graduate program, Universidad Nacional de La Plata, PhD program in Geosciences, Argentina.

- Cafaro, Edgardo.2008-present. Hydro-geomorphologic processes in the Pilcomayo River Mega-fan, the largest fan of the world, South American Chaco. CONICET Grant, Water Resources Engineering graduate program, National University del Litoral, Argentina.
- Pereira, Maria Soledad. 2009-present. Morphodynamics and facies model of the Middle Parana River from Corrientes to Rosario. CONICET Grant, Geological Sciences graduate program, Universidad Nacional de La Plata, PhD program in Geosciences, Argentina.
- Paira, Aldo.2009-present.The hydrogeomorphologic origin and morphodynamic of the lake systems of the Parana aluvial plain, Argentina. Universidad Nacional del Nordeste, PhD program in Geography, Argentina.

Supervised PhD Dissertations Completed

- Morais, Roberto Prado, 2006. An erosional-sedimentation budget for the Araguaia River, Brazil. PhD program in Environmental Sciences, Federal University of Goias, Brazil.
- Valente, Sidney. 2007. Morphotectonic and hydrologic control of wetlands in the Bananal Plain, Araguaia basin, Brazil. PhD program in Environmental Sciences, Federal University of Goias, Brazil.
- Degiovani, Susana. 2008. The Gato Creek: A study case of geomorphological and environmental dynamic in the dry Pampa, Argentina. PhD program in Geology, National University of Rio Cuarto, Argentina.
- Bayer, Maximiliano. 2010. Processes of sedimentation and environmental related aspects in the Araguaia River floodplain, Central Brazil. PhD program in Environmental Sciences, Federal University of Goias, Brazil.

Supervised Master Thesis in progress

- Vince Clause. 2012-present. UT Austin, Department of Geography and the Environment.
- Anwar Sounny-Slitine UT Austin, Geomorphic and anthropogenic influences on embanked floodplain inundation of the Mississippi river. Department of Geography and the Environment.
- Katherine Lininger-2011-present. Floodplain sedimentation rates, land use change, and hydrological analysis of the middle Araguaia River, Brazil UT Austin, Department of Geography and the Environment.
- Christine Bonthius. 2011-present. Multitemporal analysis of geomorphologic changes in the Madeira River, Amazonia, UT Austin, Department of Geography and the Environment.
- Richard Knox, 2011-present. Adjustments of the effective discharge and channel geometry of the Mississippi River to engineering since the XX Century. UT-Austin Department of Geography and the Environment.
- Edward Park, 2011-present. Multitemporal megapatterns of suspended sediments distribution in the Amazon River and the role of the largest tributaries, UT Austin, Department of Geography and the Environment.
- Tizuka Michelle, 2010-present. Geoarcheology and paleohydrological reconstructions in the Madeira River, Western Amazonia, Brazil. UNESP, Department of Geosciences, Rio Claro, Brazil.

Supervised Master Thesis completed

- Carvalho, Thiago. 2006. Flow and sediment transmission model for the Araguaia Alluvial Plain, Brazil. Federal University of Goias, M.Sc. program in Geography, Brazil.
- Bayer, Maximiliano. 2002. Erosional and sedimentary processes in the Araguaia River, Brazil. Federal University of Goias, M.Sc. program in Geography, Brazil.
- Vieira, Pedro Alves. 2002. Geomorphological dynamic and facies model of the Bananal Plain, Brazil.. Federal University of Goias, M.Sc. program in Geography, Brazil.
- Silva, Jakeline. 2002. Environmental Quality Index and Indicators in Morrinhos County, Goias, Brazil. Federal University of Goias, M.Sc. program in Geography, Brazil.
- Moraes, Roberto Prado de. 2001. Evolution of sedimentation rates in the Araguaia River: Historical changes during that last forty years. Federal University of Goias, M.Sc. Geography Program, Brazil.
- Guedes, Helio. 2000. Abiotic controls of vegetation in rivers of Southwestern Amazon, Brazil. Federal University of Acre, MSc Ecology program, Brazil.
- Lima, Maria. S. 1998. Mass movements in Rio Branco city, Acre, southwestern Amazon, Brazil. Co-advisor, Federal University of Santa Catarina, Brazil, MsC. Geography Program, Brazil.

Supervised Granted Graduated technicians

- Gonçalves, Kenya. 2002-2003. Technician of the Laboratory of Geology and Physical Geography-LABOGEF- Federal University of Goias, Brazil. CNPq-Brazil,.
- Olazar, Leandra**.** 2000-2001. Technician of the Laboratory of Geology and Physical Geography-LABOGEF- Federal University of Goias, Brazil. CNpq-Brazil,

Supervised Undergraduate Honors (completed)

- Rifle, Lauren A. 2012. Deforestation impacts on fluvial systems in the Amazon river basin Department of Geography and the Environment, UT, Austin.
- Tristão, Gisela Martins. 2002. Geomorphologic characteristics and hydro-sedimentological dynamic of the lake systems of the Araguaia floodplain. Department of Geography, IESA, Federal University of Goias.
- Franca, Andrea. 2001. Lake system mapping of the Araguaia River floodplain. Department of Geography, IESA, Federal University of Goias.
- Morais, Roberto Prado. 1999. Quantitative Geomorphology of the Meia Ponte Basin, Brazil. Department of Geography, IESA, Federal University of Goias.
- Aquino, Samia. 1997. Hydrology of the Acre River basin, southwestern Amazonia, Brazil. - Department of Geography, Federal University of Acre, Brazil.
- Cruz, Catia Cilene Santos. 1997. Mapping and quantification of linear erosion in Rio Branco county, southwstern Amazonia, Brazil.– Department of Geography, Federal University of Acre, Brazil.
- Silva, Marcos Soares. 1996. Geomorphology and Quaternary of the Rio Acre alluvial plain.– Department of Geography, Federal University of Acre, Brazil.

Supervised Undergraduate Scholarships and Internships

- Wright, Charles. 2011. Special studies, Department of Geography, UT, Austin.
- Clause, Vince. 2011. LLILAS UT-Austin, Internship research program..
- Riddle, Katherine. 2011. LLILAS, UT-Austin Internship research program.
- Rife, Lauren. 2010. LLILAS, UT-Austin, Internship research program.
- Lacerda, Clarise. 2003-2004. Morphometry, physical and chemical parameters of the floodplain lake systems of the Araguaia River, Brazil.– Grant National Council of Research-CNPq. Federal University of Goias.
- Lesa, Alyne. 2003-2004. Hydro-geomorphology of floodplain lakes, Araguaia floodplain, Brazil.. Scholarship Grant of the National Council of Research-CNPq. Federal University of Goias.
- Correia, Manuel R.C. 2003. Sedimentary environments of the Araguaia floodplain. - Scholarship Granted by the National Council of Research-CNPq. Federal University of Goias.
- Tristão, Gisela Martins.2002. Geomorphologic characteristics and hydro-sedimentological dynamic of the lake systems of the Araguaia floodplain. 2000-2002– Scholarship Granted by the National Council of Research-CNPq.
- Araujo, Flaudio Ramos. 2000-2002. Abiotic control of vegetation in the Araguaia River floodplain. - Scholarship Granted by the National Council of Research-CNPq. Federal University of Goias.
- Franca, Andrea. 1999-2001.Lake system mapping of the Araguaia River floodplain. - Scholarship Granted by the National Council of Research-CNPq.
- Morais, Roberto Prado. 1999. Quantitative Geomorphology of the Meia Ponte Basin, Brazil. Geography Department, IESA, Federal University of Goias.
- Aquino, Samia. Hydrology of the Acre River basin, southwestern Amazonia, Brazil. 1996-1997 - Scholarship Granted by the National Council of Research-CNPq. Federal University of Acre.
- Cruz, Catia Cilene Santos. 1995-1997. Mapping and quantification of linear erosion in Rio Branco county, southwstern Amazonia, Brazil. - Scholarship Granted by the National Council of Research-CNPq.
- Silva, Marcos Soares. 1994-1996. Geomorphology and Quaternary of the Rio Acre alluvial plain. - Scholarship Granted by the National Council of Research-CNPq.
- Fortes, Mircia Ribeiro. 1992-1993. Morpho-dynamic of the Solimoes River floodplain between Careiro Island and Paciencia Island. - Scholarship Granted by the National Council of Research CNPq.

Advising of Foreign Graduated Visiting Students and Internships

- André L. Souza Celarino, PhD student of UNICAMP, Brazil, granted by FAPESP (September 2012 to March 2013), Fluvial geomorphology of central Brazil rivers,
- Alana Bacon, PhD student of Duke University (April 2010 and April 2011), Geomorphology of Peruvian Amazon.
- Andrea Cavalcante, PhD student of University Fluminense-Rio de Janeiro, granted by

CAPES-Brazil to spend 8 months working under my supervision on river management and hazards in North Eastern Brazil (fall 2010 and spring semester 2011).

- Edgardo Cafaro, PhD student of CONICET, Argentina visiting scholar to work under under my supervision on the Chaco Rivers morphodynamics and the largest megafans of the world, January 2010.
- Orlando Gonzales, PhD student from University El Libertador-Venezuela, on Plain Geomorphology and fluvio-aeolian interactions, 2006.
- Alina Crincoli, Master degree student from National University of La Plata-Argentina, to Federal University of Goias, on Plain Geomorphology and aeolian processes, 2006.
- Mirta Cabral, from National University of La Plata-Argentina to Federal University of Goias- Brazil, on Floods hazards, 2003.
- Susana Degiovani, from National University of Rio Cuarto-Argentina, on Fluvial Indicators 2004.
- Oscar Link, from Concepción University - Chile, to Federal University of Goias, on fluvial geomorphology and sediment transport, 1999.
- Marcelo Sorba, from National University of San Luis, to Federal University of Acre, on tropical geomorphology,.
- Vicente Sanchez, from National University of San Luis, to Federal University of Acre, on tropical geoomorphology, 1996.
- Arturo Aberastain, from National University of San Luis, to Federal University of Acre, on tropical geomorphology, 1996.

Member of Graduate Committee (I just listed activities developed since I am a UT professor (2009-current). Previous activities in other countries are not included)

- Leitch, Maraigh.2011. MsC in Geography, Department of Geography and the Environment, UT-Austin.
- Gonzales, O. 2011. PhD in Geology, Universidad Central de Venezuela (ongoing).
- Roy, Nanigopal. 2010. PhD in Geosciences- IITK-Kanpur, India.

ADMINISTRATIVE AND COMMITTEE AND PROFESSIONAL PUBLIC SERVICE

ORGANIZATION OF SCIENTIFIC MEETINGS

- Nominated by the International Association of Geomorphologist-IAG to manage the Tropical Geomorphology area in the oncoming IAG 8th International Conference on Geomorphology, Paris, 2013.
- Organizer Session Tropical rivers-IAG- and IGCP 582 Unesco, , IAG 8th International Conference on Geomorphology, Paris, 2013
- Organizer/chair of the AGU Fall meeting-San Francisco 2012, River morphodynamics and channel patterns: how do river patterns come to be different? (co-organizers J. Abad, Univ. Pittsburgh and P. Ahsworth, UK)
- Session Lowland Rivers, Association of American Geographers, New York, 2012 (with J. Abad-University of Pittsburgh).

- Session Fluvial morphodynamics and channel patterns, American Geophysical Union-AGU, fall meeting, San Francisco, December 2011 (with J. Abad-University of Pittsburgh and S. Lanzoni-University of Parma-Italy).
- IGCP 582 - Unesco Session Morphodynamics of fluvial systems during the anthropogenic, 14th Latin American Congress of Geology, Medellin Colombia. August, 2011.
- Brazilian Center-LLILAS-UT of the panel The Amazon: Facing Global Climate Change. UT-Austin, TX. November 10, 2010.
- Co-organizer of the 5th RCEM International Symposium, River Coastal and Estuarine Morphodynamics, IAHE- International Association of Hydraulic Engineers, Santa Fe, Argentina. September, 2009.
- Chair of the 1th IGCP-Unesco 582 and Symposium on Large South American Rivers, Brazilian and Argentinean Congress on Quaternary-ABEQUA-GAGC, La Plata Argentina. September, 2009.
- Main organizer of the International Regional Conference on Geomorphology of the International Association of Geomorphologists-IAG. Tropical and subtropical Geomorphology: methods and techniques, Goiania, Brazil. September 3-10, 2006
- Co-organizer (with Prof. Jose Stevaux-Brazil) of the GLOCOPH International Symposium, Global Commission on Continental Paleohydrology, Sao Paulo, Brazil. August 2006.
- Session Fluvial systems: land degradation and river management, COMLAND Symposium, International Commission on Land Degradation-IUG, Uberlandia, Brazil. May, 2005.
- International Course Fluvial Dynamic: processes and landforms, International Association of Geomorphologists-IAG, 2004. Brazil. (With Prof. J. Stevaux- Brazil)
- Symposium on Geomorphological Sites: vulnerability and assessment, Regional Conference on Geomorphology, International Association of Geomorphologists, México. October 28-November 7, 2003 (with Prof. E. Reynard, Switzerland).
- Workshop Late Cenozoic fluvial deposits- IGCP 449, III Latin-American Congress of Sedimentology. Belem do Pará, Brazil. June,7 -11, 2003
- International Field Conference Amazon 2003, GLOCOPH working group, Paleohydrology of Large Rivers and IGCP 449, June 12 –18, 2003 (with J.C. Stevaux, Brazil).
- Symposium S6 “Large Rivers”, International Conference on Geomorphology, Tokyo, Japan, August 2001 (with A. Gupta (UK).
- International Course “Index and Indicators of Environmental Quality” RELESA/ELANEM project, INCO program, European Community and UFG. Goias. October 29-November 11 of 2001.
- International Symposium on Paleohydrology and Geomorphology of Large Rivers and Field Conference Araguaia 99, GLOCOPH-IAG. Goiania, Brazil. September 12 to 21, 1999.
- First South-American Symposium on Paleohydrology, Global Commission on Continental Paleohydrology-GLOCOPH-INQUA, Curitiba, July 27 to August 5, 1997, ABEQUA Congress (with J.C. Stevaux-Brazil).

- Field Conference IGCP 341- UNESCO - Southern hemisphere Paleo and Neoclimates" on 'Paleo and Neoclimates in Southwestern Brazilian Amazonia. October 15 to 21, 1996.
- 4th Meeting of IGCP -UNESCO 281 - Quaternary Climates of South America - Manaus, November 8 – 12, 1992.
- International Symposium on the Quaternary of the Amazon, ABEQUA-SUDAMQUA, Manaus, November 8-12, 1992.

External teaching/Seminars etc:

I do not keep a comprehensive record of seminars that I have given, however they include presentations and courses given at the following institutions:

- Ministry of the Environment, Peru, Lima. (2012).The dam's threat and the dark future of the Amazon basin
- The University of Pittsburgh (2012). Anabranching patterns in large rivers: state of the art and clues from the tropics.
- Texas A&M University, USA (2011). Paleoclimatic and paleoenvironmental Late Pleistocene changes in tropical South America.
- Universidad EAFIT, Colombia (2010). Megarivers: ultimate adjustments in channel patterns
- University of Texas at Austin-USA (2009-2010). The dark future of the Amazon basin; The geomorphologic response of the Araguaia river to tremendous deforestation rates during the last decades
- East Carolina University, USA (2009). The late Quaternary of Tropical South America
- University of Illinois-Urbana-Champaign,USA (2008). Fluvial response to extreme deforestation in Central Brazil: the Araguaia river case.
- Duke University, USA (2008).The Late Cenozoic of Tropical South America: paleogeography, palaeoecology, palaeoclimatology
- Smithsonian, Panama (2007). The late Miocene paleogeography of the Amazon basin
- University of Frankfurt, Germany (2006). The late Pleistocene of the Amazon basin
- University of California, Santa Barbara, USA (1998). The Quaternary fluvial record of the Amazon basin
- University of Cantabria, Spain (2002, 2005). Tropical Rivers: human impacts and environmental consequences
- University of Modena, Italy (1996).
- University of Turku, Finland (1995).
- East Normal University of China, Shanghai, China (2000, 2006).
- Polish Academy of Sciences, Krakow, Poland (2000). Late Quaternary paleohydrology of South America
- University of Santa Catarina, Brazil (1997). Amazon geomorphology
- National Institute of Amazon Research-INPA, Brazil (1993, 1995, 2007). Late Cenozoic paleoecology and paleogeography of South America

- Universidad Complutense de Madrid, Spain (1997). Floods in SW Amazon
- IITK, Indian Institute of Technology, Kanpur, India (2002). Tropical rivers geomorphology
- Universidad Nacional de San Luis, Argentina (1998). Large Rivers Geomorphology
- Universidad Nacional de La Plata, Argentina (2006). Patterns of anabranching systems: ultimate adjustments in large rivers
- Universidade Estadual de Sao Paulo, UNESP, Brazil (2008). Human impacts and fluvial response in the Araguaia basin, Central Brazil.
- Argentinean Committee of Quaternary Research, International Course, Argentina (1994). Fluvial Geomorphology: lessons from South America
- Maringá State, University, Brazil (2000, 2004). Geomorphology of tropical rivers
- Secretary of Planning, Acre State, Brazil (1995). Geomorphology applied to environmental studies
- Museu Paraense Emilio Goeldi, Brazil (2002). The Quaternary paleogeography of the Amazon
- National University of El Litoral, Argentina (2007). Megarivers and anabranching patterns
- Universidad Mayor de San Andrés, Bolivia (2006). Applied fluvial Geomorphology: using index and indicators
- Universidad Pedagógica El Libertador, Venezuela (2004-2005). Quaternary of tropical South América
- University Guarulhos, Brazil. Biotic –abiotic relationshisps in fluvial systems
- International Course on Fluvial Dynamic: processes and landforms, Supported by the international Association of Geomorphologists-IAG (2009). Large Rivers morphodynamics
- University of Pittsburgh (2012) The role of anabranching patterns in megarivers

SERVICE-UNIVERSITY OF TEXAS AT AUSTIN

- Member of the Graduate Committee 2010-2011, 2011-2012
- Member of the Environment BDP-Bridging Disciplines Program, faculty panel since 2011- ongoing
- Member of the LLILAS Argentine Studies Fund Committee, 2011-2013.
- Nominator and host of the Tinker Visiting Professor-LLILAS, Dr. Juan Restrepo, University EAFIT, Colombia, fall 2011.
- Member of the committee LILAS-Brazil Center Selection committee Fulbright Brazilian visiting Professor, 2010.
- Nominator and host of a grant provided by LLILAS-Brazil Center to allow the visit of Prof. Naziano Filizola, Universidade Federal do Amazonas to generate research articles and projects in collaboration, 2010.

HOST AT UT-AUSTIN OF FOREIGN AND NATIONAL RESEARCHERS FOR COLLABORATIVE RESEARCH DUTIES

- Prof. Mario Assine, Universidade Estadual Paulista-UNESP, (research, articles preparation). (November 2012, planned)
- Prof. Juan Restrepo, University EAFIT-Colombia Visiting Tinker Professor, fall 2011 (academic and research duties).
- Prof. Jorge Abad, University of Pittsburgh, Department of Civil and Environmental Engineering (April, 2011)
- Prof. Naziano Filizola Universidade Federal do Amazonas, Department of Geography, Brazil (september, 2010).
- Prof. Alfredo Borges, Universidade Federal de Goiás, Brazil (May 2010).
- Prof. Takashi Oguchi, University of Tokyo, Japan. Vice-director, Center for Spatial Information Science, (December, 2010).

LEADERSHIP IN SCIENTIFIC ORGANIZATIONS AND INTERNATIONAL GROUPS OF RESEARCH

- Leader of the IGCP-Unesco 582 Tropical Rivers- Hydro-physical processes, impacts, hazards and management. (Co-leaders: Z. Chen (China); R. Sinha (India) and J.C Stevaux (Brazil). 2009-2013.
- Chair of the International Association of Geomorphologists-IAG working group, Geomorphology of Tropical Rivers, 2009-2013.
- Member, Steering Committee of TERPO **(**Terrestrial Processes, Deposits and History), Commission of INQUA- focus area on hydrological change and climate. Since 2007 (in activity).
- Member, Steering Committee of TERPO **(**Terrestrial Processes, Deposits and History), Commission of INQUA- focus area Quaternary Geology of South America, coordinator of the sub-area Fluvial Record. Since 2011 (in activity).
- Chair, Working/Group on Large Rivers-Global Commission on Continental Paleohydrology -GLOCOPH/INQUA. Since 1995 (in activity).
- Elected Member, Executive Committee of the International Association of Geomorphologists- IAG. 2001-2005.
- Co-leader with D. Bridgland (UK) and R. Sinha (India) of the Project IGCP 518 IGCP/Unesco, Fluvial Sequences as Evidence for Landscape and Climatic Evolution in the Late Cenozoic. 2005-2006.
- Member, Geomorphosites working group of the International Association of Geomorphologists, since 2001 (in activity).

PROFESSIONAL SOCIETY MEMBERSHIPS

- *Association of American Geographers-USA (2009-present)*
- *American Geophysical Union-AGU-USA (2008-present)*
- *Argentinean Association of Geomorphology and Quaternary (2006-present)*

- *International Association of Geomorphologists (1997-present)*
- *Member and co-founder of the Brazilian Union of Geomorphologists (UGB) (1996-present)*
- *INQUA-International Union for Quaternary Research (1995-present)*
- *Brazilian Association of Quaternary Research-ABEQUA (1992-present)*

HONORS

- Corresponding Member of the National Council of Research of Argentina-CONICET, since 2011 (honor offered to Argentinean outstanding researchers living outside the country).
- Referenced biography in "Who is Who in America", 2011.
- Member of the Scientific Board of RCEM, Subcommittee on River, Coastal and Estuarine Morphodynamics, IAHR- The International Association for Hydro-Environment Engineering and Research, since 2010-ongoing
- Thomas W. Rivers Distinguished Professor in International Affaires, East Carolina University, 2008-2009.
- Winner of the International Prize Augusto Gonzalez de Linares offered to recognized centers or individuals of Spain and Latin America devoted to environmental studies. University of Cantabria and Government of the Cantabria Region, Spain, October 2005.
- Member of the Executive Committee of the International Association of Geomorphologists- IAG, 2001-2005.
- Referenced biography in "Who is Who in the World" Millennium Edition and others, 2000..
- Referenced biography in "Who is Who in Science and Engineering " Millennium Edition and others, 2000.
- Honored, Committee of the International Conference "The environment and the XXI Century", Central University of Las Villas, Santa Clara, Cuba, 2000.
- International Scientific Committee of the Yangtze River International Conference, East Normal University of China and IAG, Shanghai, China, 1999.
- Member of the Research Council of the Brazilian Union of Geomorphologist-1996-1998.
- Founder member of the Brazilian Union of Geomorphologists-UBG-1996.

CONSULTANCIES, INTERNATIONAL COURSES, INTERNATIONAL PROJECTS/NETWORKS MANAGEMENT AND OTHER REPORTS

- Professor of the course Hydro-physical processes, hazards and impacts in the Amazon basin, IGCP 582 annual meeting and Center for Research and Education of the Amazon rainforest-CREAR, Iquitos, August 2012.
- Professor of the International Course Fluvial Geomorphology with Emphasis on Large Alluvial Systems, IGCP 582-Unesco, 14th Latin American Congress of Geology, Medellin Colombia, August, 21-22, 2011.

- Professor of the intensive graduate course Large Rivers Geomorphology, Sao Paulo State University UNESP, Brazil, November 22-25, 2010.
- Visiting Professor-graduate course- State University of Sao Paulo –UNESP-Rio Claro-Geosciences graduate program, November 2010.
- Consultant of PETROBRAS, Brazil, Environmental Project Shallow water-Platform and the interactions with the São Francisco River. UFS/FAPESE (Nº 0050.0045002.08.4), 2009-2010.
- Professor of the international graduate course on Fluvial Morpho-dynamic, 5th RCEM International Symposium, River Coastal and Estuarine Morphodynamics, IAHE-International Association of Hydraulic Engineers, Santa Fe, Argentina, 2009 in collaboration with C. Ramonell (UNL-Argentina).
- Professor of the International Graduate course, Geomorphology and Global Change, Latin-American Symposium on Geomorphology-UGB, Belo Horizonte, Brazil, 2008, together with A. Goudie (U. Oxford), M. Thomas (Univ. Stirling) and J. Rabassa (CONICET).
- Professor, Course on Large Fluvial Systems, Geological Survey of Brazil-CPRM, Manaus, Brazil, June, 2008.
- Consultant in Fluvial Geomorphology, project Paraná-Paraguay River Navigation Effects Study, Rio Tinto mining company- North West Hydraulic Consultants-NHC to evaluate navigation viability and environmental impacts from Caceres (Brazil) to San Nicolás (Argentina), 2006-2007 and 2008-2009.
- Consultant of the International Association of Geomorphologists to assess the World Heritage nomination of Ba Be National Park, Vietnam, as solicited by the World Heritage Committee and International Union for Conservation of Nature-IUCN.
- Professor of the Specialization Graduate Course in Fluvial Environments organized by the Brazilian Oil Company PETROBRAS-Universidade Federal de Sergipe, Aracaju, Brazil, 2006.
- Executor and chair of the Geomorphologic Map of Goias State, contracted by the Goias State Agency of Geology and Mining (covering an area of ~400,000 sq.km). 2004-2005.
- Consultant of Furnas Electric Brazilian Company , Geological Survey of Brazil -CPRM and Federal University of Rondonia as expert in fluvial geomorphology and Quaternary, to analyze the impact of a planned large dam on the Madeira River and fossiliferous Quaternary deposits, 2004-2005.
- Professor of the course Dynamic of fluvial systems: applications for multidisciplinary river management. United Nations- International Atomic Energy Agency, La Paz, Bolivia, July 16-22, 2005.
- Consultant to the Secretary of Water Resources-SEMARH, Goias State, in environmental impact analysis on the Upper Araguaia basin, period: 2003-2004.
- Consultant to Organization of American States-OAS and Federal University of Sergipe, Assessment of Erosional processes on the Lower São Francisco River. 2001-2002.
- Consultant to the Environmental Agency of the Goiás State, in environmental problems related to the Araguaia-Tocantins waterway. 2001.

- Consultant to the Brazilian Geological Survey CPRM for several Projects on the Amazon Basin and the Bolivia-Brazil Zoning project, supported by Organization of American States-OAS, as a specialist in Geomorphology. 1999-2001.
- Organizer and professor of the International Curse on Indicators and Indexes Environmental Quality, UFG-UEG, supported by European Union Latin. American Network on Environmental Assessment and Management- ELANEM Project, Goiás, Brazil.
- Consultant to Federal Brazilian Institute for the Environment and Ministry of the environment- IBAMA on water resources, preparation of the project Ecological Corridors in the Araguaia-Bananal fluvial System. 2000.
- Scientific and administrative responsible for the collaboration program between University of Modena-Italy and Federal University of Goias-Brazil-2002-2006 -.
- Consultant to the United Nations Program for the Development/UNPD, Projects in the Amazon Region such as "Socio-economic and Ecologic Zoning of Rondonia State" and "Socio Economic and Ecologic Zoning of the Mato Grosso State", from 1995 to 1998 as a specialist in Geomorphology. Budget: more than 25 million dollars each project.
- PI and delegate of the Federal University of Acre Fed. BETA network, Alfa Program European Community,1995-1998. (Universities of Italy, Spain, Mexico, Netherlands, Argentina, Brazil, Chile and Cuba)
- Consultant on environmental problems and planning in Extractive Reserves, Southwestern Amazonia, Acre state. Technologic Foundation of Acre State - FUNTAC. 1996.
- PI and delegate of the Federal University of Acre Fed. Alfa Program European Community ERLAND network, 1994-1998 (Universities of UK, France, Finland, Ecuador, Brazil and Peru)
- Representative of the Federal University of Amazonas, Brazil- UFAM – Consulate of Venezuela – Elaboration of projects and academic bi-national agreements, Venezuela , July/August , 1992.

MEMBER OF EDITORIAL BOARDS

- *Journal of Geography and Natural Disasters (2012-ongoing)*
- *Alpine and Mediterranean Quaternary (2011-ongoing)*
- *Latin American Journal of Sedimentology and Basin Analysis (2006-ongoing)*
- *Paleoecology of Africa (2005-ongoing)*
- *Geomorphology (2001-ongoing)*
- *Revista Brasileira de Geomorfologia (1998-ongoing)*

REVIEWER OF MANUSCRIPTS

Geomorphology; Earth Surface Processes and Landforms; Quaternary International; Quaternary Research; Quaternary Science Review; Annals of the Association of American Geographers; Sedimentology; Sedimentary Geology; Geoarcheology; Journal of South American Earth Sciences; Palaeogeography Palaeoecology Palaeoclimatology; Natural Hazards; Biogeochemistry; Paleoecology of Africa; Zeitchrifst fur Geomorphologie; Latin

American Journal of Sedimentology and Basin Analysis; CATENA; Journal of Latin American Geography; Journal of Maps; Geografia Física e Dinámica Quaternaria (Italy); Revista Brasileira de Geociências; Revista Brasileira de Geomorfologia; Acta Scientiarum; Acta Amazónica; Anais da Academia de Ciencias do Brasil; Boletim Goiano de Geografia; Wetland Management and Ecology; Applied Geography; Remote Sensing and the Environment; Science of the Total Environment; International Journal of Applied Earth Observation and Geoinformation, International Journal of Sedimentary Research, Progress in Phisical Geography, Caldasia, Journal of Geophysical Research - Earth Surface, Elsevier, Wiley and Pearson Higher (reviews of book proposals in Earth Sciences).

REVIEWER OF RESEARCH GRANTS

- *National Science Foundation-NSF*
- *National Geographic Society*
- *Swiss Science Foundations, Switzerland*
- *National Council of Research, Brazil (CNPq)*
- *CAPES- Brazil,*
- *Ministry of Science and Technology, Argentina*
- *CONICET, National Council of Research, Argentina*
- *Federal University of Parana, Brazil*

MAIN SCIENTIFIC LONG VISITS AND LONG DURATION FIELD CONFERENCES

- Visitor Researcher, Wood Hole Research Center, Falmouth, USA, February 2008.
- Visitor Researcher, Duke University, USA, April 2007 and March 2008.
- Visitor Researcher, Smithsonian, Panama, June, 2007.
- Visitor Researcher, University of Frankfurt, Department of Geography, May 2006.
- Visitor Researcher, Institute of Geomorphology and Soils, Universidad Nacional de La Plata, Argentina, from February to July 2005.
- University of Cantabria, Spain. Several short visits related to research projects from 1998 to 2005.
- Visitor Researcher, Department of Geosciences, University of Modena, Italy, December 1995 to March 1996, and several other short visits from 1999 to 2004.
- Visiting Researcher Indian Institute of Technology-IITK, Department of Geology, to do field work in the Ganges River basin in collaboration with Dr. Rajiv Sinha, Kanpur, India, December 2002.
- Visiting Researcher to University of Wollongong, Australia and participation in the GLOCOPH-FLAG-IGCP 449 Field meeting “Evidences for climate and flow-regime change in the Quaternary of Central Australia”. Organized by Dr. G. Nanson, University of Wollongong, Australia. June 28 to July 20, 2001.

- International Field Conference Mekong River 2000, with field work to Laos. IAG Large Rivers Working Group,
- Scientific visitor, University of Florida, to discuss on fluvial Geomorphology with Dr. J. Mossa, Gainesville, February, 2000.
- Visitor Researcher**,** Polish Academy of Sciences, to discuss Paleohydrology with Dr.Leszeck Starkel and Dr. Thomas Kalicki, Krakow, Poland, October, 2000.
- Yangtze River International Conference, East Normal University of China and IAG, Shanghai, China, 1999, organized by Z. Chen. Field trip along the lower and middle Yang Tse.
- Scientific visitor, University of California at Santa Barbara (UCSB), Department of Geography, to discuss aspects on the Amazon basin with Dr. Leal Mertes and Dr. Thomas Dunne, August 1998.
- Visitor Researcher, Department of Geology, Universidad Complutense de Madrid, to study the Rio Tajo in collaboration with Dr. Guillermina Garzón, Ibero-America Cooperation Program, February 1997.
- Visitor Researcher, Department of Geology, University of Turku, Finland, August/September 1995.
- Research training in Glacial Geomorphology and Quaternary Glaciations of Patagonia, Austral Center for Scientific Research-CONICET, Ushuaia, Tierra del Fuego, Argentina, February and March, 1989.

OTHERS REMARKABLE FIELDTRIPS RELATED TO SCIENTIFIC AND ACADEMIC ACTIVITIES.

Tierra del Fuego-Argentina (1989); IGCP Field Conferences to Bolivian Andes (1989); South Chile (1994); GLOCOPH field trips to Central Spain (1996), Japanese Alps (1998); China-Tibetan plateau and Yangtze Basin (1999 and 2006); Colombian Andes (1990 and 2010); Kursk-Russian plains, (2000); Mekong River (Laos DR), (2000); Carpathian Mountains and Vistula river basin, Poland (2000); Central Australia, (2001); Kruger National Park-South Africa (2001); Peninsular India - Deccan Plateau, (2002); Ganges River-India (2002); Northern Spain (2005); Baja California-México (2004); The Smoky Mountains-Appalachians (2008); West USA National Parks (2009); Cape Lockout-NC (2008).

COLLABORATORS/SYNERGISTIC ACTIVITIES (from publications and projects - last 36 months)

C. Jaramillo (Smithsonian), P. Baker (Duke Univ.), C. Rigsby (ECU-USA), Michael Coe (Wood Hole Research Center), Roxana Ferreira (ECU), Rick Madden (Duke Univ.), Jorge Abad (Univ. of Pittsburgh), Jose C. Stevaux (UEM-Brazil), Naziano Filizola (UFG-Brazil), L. Fontes (UFS-Brazil), Maria L. Absy (INPA-Brazil), M. Cozzuol (UFMG-Brazil), Maria L.P. Herrmann (UFSC-Brazil), Leandro Oliveira (UFG-Brazil), Silane Silva (UFMT, Brazil), Laerte G. Ferreira (UFG-Brazil), Manuel Ferreira (UFG, Brazil) C. M. Bezada (UPELD-Venezuela), J. Restrepo (EAFIT-Colombia), Zonghuan Chen (ENUC-China), Rajiv Sinha (IITK-India), G. Nanson (U. Wollongong-Australia), G. Ramonell (UNL-Argentina), Mario Amsler (INALI-Argentina), J. Argollo (UMSA-Bolivia), E. Frances (UCAN, Spain), G. Perillo (IADO-Conicet, Argentina), Daniel Brea (INA, Argentina), Juan Carlos Montero (Univ. of Freiburg, Germany)..
