FIGURES	v
TABLES	ix
FOREWORD	xi
ACKNOWLEDGMENTS	xiii
CHAPTER 1—THE NUMBER SYSTEM	1
Objectives	1
Introduction	1
Whole Numbers	4
Common Fractions	14
Mixed Numbers	21
Decimal Fractions	24
Roots and Powers	32
Self-Test	36
CHAPTER 2—THE CALCULATOR	39
Objectives	39
Introduction	39
Choosing a Calculator	40
Understanding Calculator Functions	45
Operating a Calculator	49
Self-Test	57
CHAPTER 3—NUMBER RELATIONS	59
Objectives	59
Introduction	59
Percentage	59
Ratio and Proportion	63
Mean (Average), Median, and Mode	67
Tables and Graphs	70
Self-Test	79
CHAPTER 4—SOME PHYSICAL QUANTITIES AND THEIR MEASUREMENT	83
Objectives	83
Introduction	83
Length, Area, and Volume	86
Time and Temperature	96
Mass and Related Derived Quantities	101
Work and Power	108
Electricity	110
Self-Test	117
CHAPTER 5—PRINCIPLES OF ALGEBRA	121
Objectives	121
Introduction	121

Algebraic Expressions	121
Equations	128
Formulas	131
Self-Test	142
CHAPTER 6—PRACTICAL GEOMETRY	147
Objectives	147
Introduction	147
Plane Figures	148
Conversions and Formulas Tables	155
Solid Figures	159
Tables for Volumes and Surface Area	166
Geometric Constructions	170
Self-Test	182
CHAPTER 7—TRIGONOMETRY	187
Objectives	187
Introduction	187
Right Triangle Trigonometry	188
Oblique Triangle Calculations	197
Self-Test	202
CHAPTER 8—ADVANCED MATH CONCEPTS	207
Objectives	207
Introduction	207
Binary Arithmetic	208
Special Binary Codes	214
Boolean Concepts	217
Self-Test	223
CHAPTER 9—ADVANCED OIL INDUSTRY APPLICATIONS	227
Objectives	227
Introduction	227
Electrical Power and Power Factor Equations	228
Mathematics in Drilling Operations	239
Mathematics in Production Operations	259
Mathematics in Pipeline Operations	269
Mathematics in Refining Operations	275
Self-Test	279
APPENDICES	283
A. Commonly Used Formulas	283
B. Reference Tables	287
C. Conversion Factors	293
ANSWER KEY	299
Answers to Practice Problems	299
Answers to Self-Test	303

FIGURES

2.1	Typical calculator keyboards	41
2.2	Entries and displays on an arithmetic logic calculator	42
2.3	Entries and displays on an algebraic logic calculator	42
2.4	Entries, displays, and memory in an RPN calculator	43
2.5	Entries and displays in a graphing calculator	43
2.6	Arithmetic calculator	50
2.7	Entries and displays on an arithmetic calculator using memory key	50
2.8	Algebraic logic scientific calculator	53
2.9	Entries and displays on an algebraic logic calculator	54
2.10	An RPN calculator	55
2.11	Stack memory of an RPN calculator	55
3.1	Percent relations	60
3.2	Direct proportion	64
3.3	Inverse proportion	64
3.4	Pulley arrangement	65
3.5	Gear arrangement	65
3.6	Simple table	70
3.7	Simple graph	70
3.8	Reference table	71
3.9	Parts of a table	72
3.10	Table data	72
3.11	Pair of reference axes	72
3.12	Information arranged in tabular form	73
3.13	Points plotted for a graph	73
3.14	Bar graph showing tabular data given in figure 3.12	73
3.15	Line graph showing tabular data given in figure 3.12	74
3.16	Broken-line graph	74
3.17	Curved-line graph	74
3.18	Curved graph showing a general relationship	75
3.19	Circle graph or pie chart	75
4.1	Micrometer caliper	87
4.2	Section of a conventional ruler, divided into sixteenths	87
4.3	Section of a metric ruler, divided into tenths	88
4.4	Equal-sided square and cube	89
4.5	A rectangle and a rectangular solid	89
4.6	Several forms of triangles	90
4.7	The area of a triangle	90
4.8	A comparison of various temperature scales	98
4.9	Ohm's law wheel	111
4.10	Electrical symbols	111
4.11	Series circuit	112
4.12	Parallel circuit	112
4.13	Parallel circuit with total current	112

4.14	Series circuit with three resistors	112
4.15	Parallel circuit with four branch resistors	113
4.16	Series-parallel circuit arrangement	113
4.17	Power law wheel	114
6.1	A right angle	148
6.2	Circle	148
6.3	Acute angle	148
6.4	Obtuse angle	148
6.5	Parallel lines	148
6.6	Parallelogram	149
6.7	Rectangle	149
6.8	Square	149
6.9	Area and perimeter of a rectangle	149
6.10	Trapezoid	150
6.11	Right triangle	150
6.12	Equilateral triangle	150
6.13	Isosceles triangle	150
6.14	Scalene triangle	150
6.15	Parallelogram has two identical triangles	151
6.16	Dimensioned triangle	151
6.17	Diagram showing side relationships	151
6.18	Triangle problem	151
6.19	Triangle solution	151
6.20	Regular six-sided polygon (hexagon)	152
6.21	Octagon	152
6.22	Irregular five-sided polygon (pentagon)	152
6.23	Parts of a circle	153
6.24	Concentric circles	153
6.25	Semicircle	153
6.26	Dimensioned circle	154
6.27	Ellipse	154
6.28	Dimensioned ellipse	155
6.29	Cube	159
6.30	Rectangular solid	159
6.31	Cylinder	160
6.32	Elliptical solid	161
6.33	Cone	162
6.34	Lateral area of a cone or conical surface	162
6.35	Dimensioned cone	162
6.36	Pyramids	163
6.37	Dimensioned pyramid	163
6.38	Lateral area of pyramid	163
6.39	Frustrum of a cone	164
6.40	Frustrum of a pyramid	164
6.41	Frustrum cone calculations	164
6.42	Frustrum pyramid calculations	165
6.43	Sphere	165
6.44	Compass drawing	171

6.45	Bisecting a line	171
6.46	Bisecting a line	171
6.47	Bisecting a line	171
6.48	Bisecting a line	171
6.49	Bisecting an arc	171
6.50	Bisecting an angle	172
6.51	Bisecting an angle	172
6.52	Bisecting an angle	172
6.53	Constructing a circle	172
6.54	Constructing a circle	172
6.55	Constructing an angle	172
6.56	Constructing an angle	172
6.57	Constructing an angle	173
6.58	Constructing an angle	173
6.59	Constructing a parallel line	173
6.60	Constructing a parallel line	173
6.61	Constructing a parallel line	173
6.62	Constructing a parallel line	173
6.63	Constructing a perpendicular line	174
6.64	Constructing a perpendicular line	174
6.65	Constructing a perpendicular line	174
6.66	Constructing a perpendicular line	174
6.67	Constructing a perpendicular line	174
6.68	Constructing a perpendicular line	174
6.69	Constructing a perpendicular line	175
6.70	Constructing a perpendicular line	175
6.71	Constructing a perpendicular line	175
6.72	Constructing a perpendicular line	175
6.73	Dividing a line into parts	175
6.74	Dividing a line into parts	175
6.75	Dividing a circle into equal parts	175
6.76	Dividing a circle into equal parts	175
6.77	Constructing tangents to circle	176
6.78	Constructing tangent to circle	176
6.79	Constructing tangent to circle	176
6.80	Constructing sphere to plane	176
6.81	Constructing sphere to plane	176
6.82	Constructing sphere to plane	177
6.83	Constructing sphere to plane	177
6.84	Constructing sphere to plane	177
6.85	Constructing sphere to nonparallel lines	177
6.86	Constructing sphere to nonparallel lines	177
6.87	Drawing triangles	178
6.88	Proper drawing strokes	178
6.89	Using drawing triangle	178
6.90	Using drawing triangle	178
6.91	Drawing a line perpendicular to a line	179
6.92	Drawing a line perpendicular to a line	179
6.93	Dividing a circle into equal parts	179

7.1	Triangle ratios	187
7.2	Sides of a triangle	188
7.3	Angles of a triangle	189
7.4	Dimensioned triangle	191
7.5	Triangle side ratios	192
7.6	Triangle angle definitions	192
7.7	Triangle angle definitions	192
7.8	Dimensioned triangle	192
7.9	Dimensioned triangle	194
7.10	Dimensioned triangle	194
7.11	Dimensioned triangle	195
7.12	Oblique triangle	197
7.13	Dimensioned oblique triangle	197
7.14	Dimensioned oblique triangle	197
7.15	Area of a triangle	198
9.1	Power triangle	228
9.2	Diagram of a simple circuit	230
9.3	Diagram of a three-phase system	231
9.4	Diagram of a 480-VAC facility and load	233
9.5	Power triangles: (A) system values and (B) calculated values	234
9.6	Diagram of a modified system	234
9.7	Diagram of an example system	236
9.8	A/D converter in a PLC	237
9.9	A/D converter example	238
9.10	Diagram demonstrating engine torque	239
9.11	An engine produces mechanical power, which an alternator converts to electrical power.	241
9.12	Power loading example	242
9.13	Effective weight of pipe in drilling mud	254
9.14	Effective weight of drill collars in drilling mud	255
9.15	Standard specifications for meter runs	264
9.16	Block diagram of electronic transmitter	265
9.17	Gas measurement chart (linear)	268
9.18	Flow of crude petroleum to pipelines	273
9.19	Profile method of calculating pipeline pump station spacing	274
9.20	Material balance bottoms process	277

TABLES

1.1	Arabic Numerals and Roman Equivalents	2
1.2	Number Value and Placement	3
1.3	Decimal System of Numbers	4
1.4	Multiplication Table	9
1.5	Decimal Equivalents	30
4.1	Conventional and Metric Units of Measurement for Some Physical Quantities	84
4.2	SI Metric Prefixes	85
4.3	Units of Length Measurement	88
4.4	Units of Area Measurement	93
4.5	Units of Volume Measurement	93
4.6	Common Units of Time	96
4.7	Temperature Scales	99
4.8	Units of Weight, Mass, and Force Measurement	102
4.9	Densities of Some Solids, Liquids, and Gases	103
4.10	Specific Gravity Based on Air	105
4.11	Basic Electrical Units of Measure	110
6.1	Common Units of Area Measurement	149
6.2	Formulas for Finding Areas of Plane Figures	155
6.3	Common Units of Volume Measurement	160
6.4	Formulas for Finding Volumes	166
6.5	Formulas for Finding Lateral or Total Surface Areas of Solid Figures	167
7.1	Natural trigonometric functions	190
7.2	Reciprocal functions	193
8.1	Base Ten Numbers	208
8.2	Decimal Equivalents	209
8.3	BCD Code and Binary and Decimal Equivalents	214
8.4	ASCII Characters and the Equivalent Binary Numbers	215
8.5	Gray Code Numbers with Equivalent Binary Numbers	215
8.6	Binary Number in Groups of Three and Decimal Equivalents	216
8.7	Hexadecimal and Binary Equivalent Numbers and Letters	217
8.8	Truth Table for $C = AB$	221
8.9	Truth Table for $D = ABC$	221
8.10	Truth Table for $D = A + B + C$	222
9.1	Scale of Values	239
9.2	Lightening and Weighting Drilling Mud	245
9.3	Converting Bottle Test Results to Chemical Pump Rates	262
9.4	Minimum Length Requirements for Meter Runs	265
9.5	Negative Pipe Buoyancy	270
9.6	Fuel Gas Data	275
