Frontispiece. ConocoPhillips Britannia Platform in the North Sea x

1. Statoil's Gullfaks A platform in the North Sea 1
2. Sakhalin Molikpaq Platform, Russia, has a steel base filled with ballast for stability. 2
3. Projected petroleum liquids production 3
4. Culturally diverse offshore work crews learn to work together as a team. 4
5. Offshore crew celebration in the dining galley 5
6. Required survival training to prepare crew members for helicopter transport 6
7. Offshore crews engaged in water survival training 7
8. Helicopter transporting offshore crews 9
9. Island Valiant large anchor-handling tug supply vessel 10
10. The Kurnai Tide, a 148-foot (45-metre) offshore crew and supply vessel 11
11. Crew transfer in the Gulf of Mexico using the Frog™ transfer capsule 12
12. Personnel basket transfer using a net system 13
13. Helideck on an offshore platform 14
14. Helicopter simulator used to teach underwater survival 15
15. Offshore crew in immersion survival suits arriving at land site 16
16. Some types of offshore platforms 20
17. The Rowan Gorilla VI, a Super Gorilla Class jackup rig, located in the North Sea is both a drilling and production facility. 21
18. Drillship DP Hunter 22
19. Scarabeo semisubmersible drilling rig, Nigeria 23
20. Hibernia fixed platform off St. John's Newfoundland, Canada 24
21. Petronius compliant tower in the Gulf of Mexico 25
22. The Magnolia tension-leg oil platform operated by ConocoPhillips in the Gulf of Mexico 25
23. Semisubmersible Thunderhorse Platform in the Gulf of Mexico 26
24. Chevron's Genesis spar platform in the Gulf of Mexico 27
25. Two views of an FPSO operated by ConocoPhillips 28
26. The top drive drilling system, developed in 1982, rotates the drill pipe directly and performs normal hoisting requirements such as tripping and running casing. 29
27. Major systems of oil rig drilling equipment 30
28. Motion compensator keeps proper tension on the drill string. 31
29. Sonardyne's Marine Riser Angle Monitoring System (MRAMS) 32
30. Offshore jobs 35
31. Workers on the Hibernia platform off Newfoundland, Canada 36

Figures

32. Roughnecks at work 37
33. Derrickman on the monkeyboard 38
34. Drilling console topside on the Hibernia platform 39
35. Offshore worker at the Sable Offshore Energy Project 41
36. The control room on the Alba platform in the North Sea, United Kingdom 42
37. Ensko 51 jackup blowout, March 2001 in the Gulf of Mexico 44
38. Schematic of the Britannia offshore platform 45
39. Offshore crew work in a hazardous environment. 47
40. Map of the northern Gulf of Mexico showing the active oil and gas leases by water depth in 2006 47
41. Freefall life capsules. Freefall capsule deployment exercise. 48
42. Norsk Hydro's Oseberg C platform located in the North Sea 49
43. Offshore workers Garve Scott-Lodge and Brian James at work 53
44. Port Reval semisubmersible worker's living quarters unit 54
45. Four-person room and two-person room on the ExxonMobil Jade, Equatorial Guinea 55
46. Personal laundry room on an offshore platform 56
47. Chef Meylemans checks a party buffet table on the ExxonMobil Jade Platform in Equatorial Guinea, West Africa. 57
48. Crew dining area on the Port Rigmar jackup accommodation unit 58
49. Gym facilities on the Port Rigmar jackup accommodation unit 59
