FOREWARD	vii
ACKNOWLEDGEMENTS	ix
ABOUT THE AUTHORS	xi
1.0 INTRODUCTION	1
2.0 OVERVIEW OF LNG INDUSTRY	3
History of LNG Industry	3
Baseload LNG	5
Snapshot of Current LNG Industry	7
Developing an LNG Project	10
References	12
3.0 BASELOAD LIQUEFACTION PLANT	13
Liquefaction Technologies	13
Propane Precooled Mixed Refrigerant Process	14
Description of Air Products C3MR LNG Process	14
Liquefaction	17
LNG Flash and Storage	17
Cascade Process	17
Description of ConocoPhillips Optimized Casade SM (COPOC)	18
Liquefaction	20
LNG Flash and Storage	20
Other Liquefaction Processes	20
Description of Linde MFC [®] LNG Process	21
Precooling and Liquefied Petroleum Gas (LPG) Recovery	22
Liquefaction and Subcooling	23
Trend in LNG Train Capacity	23
Strategy for Grassroots Plant	24
References	26
4.0 RECEIVING TERMINAL	27
Receiving Terminals in the U.S.	28
Main Components and Process Descriptions	30
Marine Facilities	30
Storage Capacity	31
Process Descriptions	32
Integration with Adjacent Facilities	33
Gas Interchangeability	34
Nitrogen Injection	36
Extracting C ₂₊ Components	37
Comparing Two Methods of Compositional Adjustment	38
References	39
5.0 LNG SHIPPING INDUSTRY	41
LNG Fleet	41
Types of LNG Ships	43
Moss	44
Membrane	46
Prismatic	48
Reducing Greenhouse Gas Emissions	49
References	50
6.0 MAJOR EQUIPMENT IN LNG INDUSTRY	51
Cryogenic Exchangers	51
Spiral-Wound Heat Exchangers	52

Table of Contents

	Plate-Fin Heat Exchangers	55
	Cold Boxes	58
	Compressors and Drivers	59
	Centrifugal Compressors	60
	Axial Compressors	61
	Reciprocating Compressors	62
	Gas Turbines	62
	LNG Pumps and Expanders	64
	LNG Pumps	64
	Liquid Expanders	66
	Loading Arms	68
	LNG Tanks	69
	LNG Vaporizers	74
	Submerged Combustion Vaporizers	74
	Open Rack Vaporizers	76
	Shell and Tube Vaporizers	78
	Direct Heating with Seawater	78
	Indirect Heating with Seawater	80
	Ambient Air Vaporizers	82
	Direct Heating with Ambient Air	82
	Indirect Heating with Ambient Air	84
	References	86
7.0	SUPPORTING FUNCTIONAL UNITS IN LNG PLANTS	87
	Gas Pretreatment	87
	Slug Catcher	87
	NGL Stabilizer Column	89
	Acid Gas Removal Unit	90
	Molecular Sieve Dehydrator	92
	Mercury and Sulfur Removal Unit	92
	NGL Recovery	93
	Integrating NGL and LNG Plants	94
	Nitrogen Rejection	95
	Helium Recovery	96
	References	97
8.0	SAFETY, SECURITY, AND ENVIRONMENTAL ISSUES	99
	Safety Design of LNG Facilities	99
	Security Issues for the LNG Industry	103
	Environmental Issues	105
	References	106
9.0	OFFSHORE APPLICATIONS	107
	Offshore Design Considerations	107
	Offshore Receiving Terminal	110
	Offshore LNG Production	111
	Offshore LNG Transfer	111

Figures

2.1	Distribution of peak shaving LNG facilities in the U.S.	4
2.2	Typical peak shaving plant	4
2.3	Historical and projected global LNG capacities	5
2.4	Components in LNG monetization chain	6
2.5	Global gas market – pipeline gas and LNG	8
2.6	Breakeven economics between pipeline and LNG	8
3.1	LNG liquefaction flow scheme – C3MR™ from Air Products	15
3.2	Oman LNG plant	15
3.3	Qatargas LNG plant	16
3.4	LNG liquefaction flow scheme – COPOC™	18
3.5	Kenai, Alaska LNG plant	19
3.6	Trinidad LNG plant	19
3.7	LNG liquefaction flow scheme – Linde MFC™	21
3.8	Snøhvit LNG plant at Melkøya Island	21
3.9	Trend of LNG train capacities	23
4.1	LNG receiving terminal at Everett, Massachusetts	28
4.2	Artist's drawing of expanded Lake Charles receiving terminal	29
4.3	Existing and proposed North American LNG terminals	29
4.4	Potential North American LNG terminals	30
4.5	Process scheme of typical LNG receiving terminal	31
4.6	Thermal integration between the LNG terminal and power plant	33
4.7	HHV versus methane content of different LNG sources	35
4.8	Nitrogen injection scheme	36
4.9	Three categories of C ₂₊ extraction schemes	37
5.1	Sizes of global LNG ships in 2005	41
5.2	Number of global LNG through 2005	42
5.3	LNG containment shipping systems	43
5.4	LNG ships: Methane Princess and Methane Progress in River Fal, Cornwall, UK	44
5.5	A. Kvaevner Moss-type LNG containment ship: Arctic Princess B. Schematic of Kvaevner Moss type containment system	45
5.6	Membrane LNG containment ship Gaz Transport No. 96 (GTT)	46
5.7	Membrane LNG containment ship Technigaz Mark III (GTT)	47
5.8	IHI SPB LNG containment ship Polar Eagle	48
6.1	Manufacturing a spiral-wound heat exchanger	52
6.2	Transporting a spiral-wound exchanger by rail	53
6.3	Exporting a spiral-wound exchanger from port	53
6.4	Manufacturing, transporting, and erecting spiral-wound exchangers	54
6.5	Schematic and example of cores plate-fin heat exchangers (PFHE)	55
6.6	Plate-fin heat exchangers (PFHE)	56
6.7	Schematic and example of core-in-kettle configuration	57
6.8	Examples of cold box construction	58
6.9	Centrifugal compressor and its components	60
6.10	Axial compressor and its components	61
6.11	Gas turbine and its components – General Electric	63
6.12	Heavy lift vessel Blue Marlin ballasted down to allow tugs to pull the process barge off its deck (artist's rendering). Note size of the 5 power-gen packages using LM-6000 machines in relation to the size of the liquefaction plant.	63

6.13	Schematics of LNG pumps: canned and in-tank pumps	64
6.14	Two types of LNG pumps: canned and in-tank pumps	65
6.15	Schematics of constant versus variable speed liquid expanders	67
6.16	Constant versus variable speed liquid expanders	67
6.17	LNG loading arms	68
6.18	Schematics of above and inground LNG tanks	70
6.19	Construction of a single containment LNG tank with dykes	71
6.20	Double containment LNG tanks with (A) and without (B) earthen embankment	71
6.21	Full containment tanks at LNG terminal	72
6.22	Korean Gas Incheon LNG terminal featuring many aboveground membrane tanks	73
6.23	All concrete containment tank	73
6.24	Underground and aboveground containment tanks in Japan	74
6.25	Schematic of submerged combustion vaporizer (SCV)	75
6.26	Schematic and example of open-rack vaporizer (ORV)	76
6.27	Schematic of integrated and ensemble design shell and tube vaporizers (STV)	79
6.28	Schematic of integrated intermediate fluid vaporizer (IFV)	80
6.29	Schematic of an intermediate fluid vaporizer (IFV)	81
6.30	Schematic of a remote location ambient air vaporizer (AAV)	82
6.31	Examples of remote location ambient air vaporizers (AAV)	83
6.32	Mustang SMART® design ambient air vaporizer (AAV)	84
7.1	Schematic of functional units inside an LNG plant	88
7.2	Statoil Melkøya Island facilities under construction October 2004	88
7.3	Statoil LNG facilities and slug catcher in transport	89
7.4	Qatargas upstream facilities	90
7.5	Schematic of typical flow in a solvent-based process	91
7.6	Absorber (left) and regenerator at an AGRU plant	91
7.7	Schematic of typical NGL recovery in an LNG plant	93
7.8	Schematic example of expander-based NGL recovery integrated with LNG systems	94
7.9	Examples of small scale nitrogen rejection units in gas processing	95
7.10	Schematic of nitrogen rejection unit in an LNG plant (U.S. Patent 5,421,165 Paradowski, et al)	96
8.1	Protection for LNG shipping provided by the U.S. Coast Guard	103
8.2	Protection for an LNG ship by the U.S. Coast Guard	104
8.3	U.S. Coast Guard LNG ship protection	104
9.1	Gravity based offshore concrete LNG storage tank (artist's rendering)	108
9.2	Tandem LNG offshore loading (artist's rendering)	109
9.3	Side-by-side LNG offshore loading (artist's rendering)	109
9.4	Schematic of the Bishop Process™	110
