

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	A Comprehensive Realism . . . . .	1
1.2	Metaphysical Method . . . . .	3
1.3	A Third Way: Causalism as an Alternative to Both Physicalism and Mysterianism . . . . .	4
1.4	Causal Internalism and Vertical Causation . . . . .	5
1.5	The Ontology of Causation . . . . .	9
1.6	The Need for an Indeterministic Model . . . . .	10
1.7	A Causal-Probabilistic Theory of Information . . . . .	10
1.8	Why an Exact Theory? . . . . .	11
1.9	The Big Picture: Preview of Part II . . . . .	12
1.10	A Glossary of Symbols . . . . .	16
<b>I</b>	<b>A Theory of Causation and Information</b>	<b>19</b>
<b>2</b>	<b>Toward a Unified Theory of Causation</b>	<b>21</b>
2.1	Hume and the Nomological/Deductive Tradition . . . . .	22
2.2	Theories of Probabilistic Causation . . . . .	23
2.3	Davidson and Event-Tokens . . . . .	23
2.4	Lewis's Counterfactual Account . . . . .	24
2.5	Mackie's INUS Conditions . . . . .	26
2.6	Yablo's Theory . . . . .	26
2.7	Branching-Time Models . . . . .	28
2.8	Recent Work in Artificial Intelligence and Causal Inference	28
2.9	Tooley and Cartwright . . . . .	29
2.10	Process and Ontological-Linkage Theories . . . . .	29
2.11	Mellor's Theory . . . . .	30
2.12	Accounts of Causal Asymmetry . . . . .	31
2.13	Distinctive Features of My Theory . . . . .	33

<b>3</b>	<b>Situation Theory and Causation</b>	<b>35</b>
3.1	The Need for Situation Theory . . . . .	35
3.1.1	Naked Infinitives and Situation Theory . . . . .	35
3.1.2	From Perception to Causation . . . . .	37
3.1.3	The Frege-Church Slingshot . . . . .	39
3.1.4	The Transitivity of Causation . . . . .	41
3.2	Situation Mereology and Causation . . . . .	42
3.3	A Situation-Theoretic Logic of Causation . . . . .	44
3.3.1	Failures of Substitution . . . . .	46
3.4	The Transitivity of INUS Causation . . . . .	46
<b>4</b>	<b>A Deterministic Model</b>	<b>51</b>
4.1	Desiderata . . . . .	52
4.2	Causation and Determinism . . . . .	53
4.2.1	Token Determinism and Type Determinism . . . . .	53
4.2.2	Expressibility of Strictly Sufficient Conditions . . . . .	54
4.2.3	Empiricist Conceptions of Determinism . . . . .	54
4.3	Basic Ontology . . . . .	56
4.3.1	Classification Systems . . . . .	56
4.3.2	Models . . . . .	56
4.3.3	Situation Types . . . . .	57
4.3.4	Persistence of Situation-types . . . . .	58
4.3.5	Identity Conditions for Tokens . . . . .	58
4.3.6	The Causal Priority Relation . . . . .	60
4.4	Constraints and Causation . . . . .	62
4.4.1	Token-Level Causation . . . . .	62
4.4.2	Type/Type Constraints . . . . .	63
4.5	Defining Causal Explanation (or Fact/Fact Causation) . . . . .	64
4.5.1	Negative Causation . . . . .	65
4.6	Humean Supervenience and Singular Causation . . . . .	67
4.6.1	Heterogeneous Causal Explanations . . . . .	68
4.7	Empiricism and Modality . . . . .	69
4.8	Causal Relevance . . . . .	69
4.8.1	Merely Disjunctive (Gerrymandered) Properties . . . . .	70
4.8.2	Efficacy of Dispositional Properties . . . . .	71
4.9	Piecemeal Causation . . . . .	74
4.10	Desirable Features of the Theory . . . . .	74
4.10.1	Transitivity, Asymmetry and Veridicality . . . . .	74
4.10.2	From Causal Mereology to Topology . . . . .	75
4.10.3	Counterfactuals and the Causal Theory of Spacetime . . . . .	76
4.10.4	Modal Partiality . . . . .	77
4.10.5	Teleofunctional Generalizations . . . . .	77

4.10.6	Compatibility with Indeterminism . . . . .	78
4.11	Applying the Theory to Some Examples . . . . .	78
4.11.1	A Finite Automaton . . . . .	79
4.11.2	Supply and Demand . . . . .	80
4.11.3	A Turing Machine . . . . .	81
4.11.4	One-Dimensional Billiards . . . . .	83
4.12	Verifying the Axioms of Chapter 3 . . . . .	85
<b>5</b>	<b>An Indeterministic Model</b>	<b>87</b>
5.1	Beyond Determinism . . . . .	87
5.2	Why an Indeterministic Account is Difficult . . . . .	88
5.3	If not Determinism, then What? . . . . .	89
5.4	Causation and Causal Explanation . . . . .	91
5.4.1	Token-Level Causation, without Determinism . . . . .	91
5.4.2	Redefining Causal Explanation . . . . .	92
5.5	Desirable Features of the Theory . . . . .	93
5.5.1	Transitivity and Irreflexivity . . . . .	93
5.5.2	Paradoxes of Causation and Statistics . . . . .	94
5.5.3	Genuine Overdetermination . . . . .	96
5.5.4	Preemption by Trumping . . . . .	97
5.5.5	Negative Causation Revisited . . . . .	97
5.6	Example Applications . . . . .	99
5.6.1	Turing Machines . . . . .	99
5.6.2	One-Dimensional Billiards . . . . .	100
5.6.3	Mackie's Slot Machines . . . . .	100
<b>6</b>	<b>A Probabilistic Model of Causation</b>	<b>103</b>
6.1	Models . . . . .	103
6.2	Token Causation . . . . .	104
6.3	Weighted Causal Constraints on Types . . . . .	105
6.4	Probabilistic Explanation . . . . .	105
6.5	Examples . . . . .	105
6.5.1	Risky Surgery . . . . .	105
6.5.2	The Pill and Thrombosis . . . . .	106
6.5.3	A Hole in One the Hard Way . . . . .	107
6.5.4	Mishap at Reichenbach Falls . . . . .	108
6.5.5	Cartwright's Poison Oak Defoliant . . . . .	109
6.6	Humphreys Explanation . . . . .	109

<b>7</b>	<b>Higher-Order Causation: Modal &amp; Causal Facts as Causes</b>	<b>111</b>
7.1	A Problem with Higher-Order Causation . . . . .	111
7.2	Modal Facts as Causes . . . . .	113
7.3	The Causal Relevance of the Law of Excluded Middle . . .	114
7.4	First-order Teleological Causation . . . . .	116
7.5	Higher-order Teleological Causation . . . . .	118
<b>8</b>	<b>The Universality of Causation</b>	<b>121</b>
8.1	A Modal Mereology of Situations . . . . .	122
8.2	Principles of Causation . . . . .	123
8.3	The Universality of Causation . . . . .	124
8.3.1	The Role of Defeasible Reasoning . . . . .	124
8.3.2	Is the Universality of Causation Merely Heuristic? . . .	124
8.4	The Existence of an Uncaused First Cause . . . . .	125
8.4.1	The Nature of Modality . . . . .	125
8.4.2	A Sketch of the Proof . . . . .	126
8.5	The Well-Foundedness of Causation . . . . .	127
8.6	Objections . . . . .	128
8.6.1	Isn't Causation Valid Only for the Phenomenal World?	128
8.6.2	What about Quantum Mechanics? . . . . .	129
8.6.3	Doesn't the Argument to a First Cause Assume the Impossibility of an Infinite Regress? . . . . .	130
8.6.4	Doesn't the Argument Commit the Fallacy of Com- position? . . . . .	130
8.6.5	Isn't Necessary Existence an Impossibility? . . . . .	130
8.6.6	Isn't it Also the Case that Contingent Facts Typically Have Contingent Causes? . . . . .	131
8.6.7	Where Did the First Cause Come From? . . . . .	134
8.6.8	The James Ross Objection: Did the First Cause Cause that It Caused the World? . . . . .	134
8.6.9	William Rowe's Objection . . . . .	135
<b>9</b>	<b>A Theory of Information and Misinformation</b>	<b>137</b>
9.1	Introduction . . . . .	137
9.2	The Historical (Retrospective) Strategy . . . . .	138
9.3	Two New Strategies . . . . .	140
9.3.1	Fallible Information . . . . .	140
9.3.2	Conditional Functions . . . . .	143
9.4	Information as the Basis of Knowledge . . . . .	144

<b>10 A Look Back, and Ahead</b>	<b>147</b>
10.1 The Causal Relation . . . . .	147
10.2 Against Determinism . . . . .	148
10.3 Spacetime as Constrained by Causation, Not Vice Versa . .	149
<b>II Applications to Metaphysics, Epistemology and Ethics</b>	<b>151</b>
<b>11 An Overview</b>	<b>153</b>
11.1 Teleology as Higher Order Causation . . . . .	153
11.2 Teleosemantics . . . . .	154
11.3 The Link between Teleosemantics and Epistemology . . . .	155
11.4 Causal/Teleological Accounts of Knowledge . . . . .	156
11.5 Mental Causation and Qualia . . . . .	156
11.6 Teleological Accounts of Ethics and Morality . . . . .	156
11.7 Enduring Substances as Logical Constructions . . . . .	158
<b>12 Teleology as Higher-Order Causation</b>	<b>159</b>
12.1 Three Definitions of Teleology . . . . .	159
12.1.1 The Taylor/Wright Account . . . . .	159
12.1.2 From Woodfield and Bedau to Aristotle . . . . .	161
12.1.3 Natural Selection Accounts . . . . .	166
12.2 Does Darwinism Support Real or Only Apparent Functionality? . . . . .	168
12.3 Retrospective Versus Non-retrospective Accounts . . . . .	169
12.4 Extrinsic Functions and the Extended Phenotype . . . . .	171
12.5 Our Knowledge of Teleology . . . . .	172
12.6 Teleological Natural Kinds . . . . .	173
<b>13 Causal Theories of Mental Content</b>	<b>175</b>
13.1 Millikan . . . . .	175
13.2 Dretske . . . . .	176
13.3 Fodor's Critique of Teleological Semantics . . . . .	179
<b>14 Teleosemantics of Mental Representations</b>	<b>181</b>
14.1 An Overview of Representational States . . . . .	181
14.2 Pre-cognitive States: Reflexes, Perceptions and Appetites .	184
14.3 Cognitive States: Opinions and Intentions . . . . .	187
14.4 The Independence of Mental Representation and Public Language . . . . .	188
14.5 The Narrowness of Non-linguistic Mental Content . . . . .	189

14.6	Teleosemantics and the Liar Paradox . . . . .	190
<b>15</b>	<b>A Causal Theory of Logical and Mathematical Cognition</b>	<b>191</b>
15.1	The Need for a Causal Theory . . . . .	191
15.2	Logico-modal Facts as Causes . . . . .	192
15.3	Knowing How to Infer Correctly . . . . .	194
15.4	Is Logic Factual? . . . . .	196
15.4.1	The Form/Content Distinction . . . . .	196
15.4.2	A Critique of Conventionalism . . . . .	197
15.4.3	Logic as the Precondition of Thought . . . . .	206
15.4.4	The Apriority and Unrevisability of Logic . . . . .	207
15.5	Logical and Physical Necessity . . . . .	208
15.6	From Logic to Arithmetic . . . . .	210
15.6.1	The Infinity of the Universe . . . . .	211
15.6.2	Kripke and Wittgenstein on Rule-Following . . . . .	212
15.7	Set Theory and Other Branches of Mathematics . . . . .	215
15.8	Alternatives to Mathematical Realism . . . . .	217
15.8.1	Fictionalism . . . . .	217
15.8.2	Structuralism . . . . .	219
15.8.3	Modalism . . . . .	219
15.9	Why the Human Mind is not a Turing Machine . . . . .	219
<b>16</b>	<b>A Teleological Theory of the Mind</b>	<b>221</b>
16.1	The Irony of Non-reductive Materialism . . . . .	221
16.2	Supervenience and Type and Token Identity . . . . .	222
16.3	Downward Causation and the Threat of Epiphenomenalism . . . . .	225
16.4	Two Further Problems of Mental Causation . . . . .	230
16.5	Qualia . . . . .	231
16.6	Problem Cases . . . . .	232
16.6.1	The Inverted Spectrum . . . . .	232
16.6.2	Mary the Color Scientist . . . . .	234
16.6.3	Killer Yellow and Magnetic Green . . . . .	237
16.6.4	Zombies . . . . .	238
16.7	Explaining the Correlation of Qualia and Physiological States . . . . .	239
16.8	Free Will . . . . .	239
<b>17</b>	<b>Teleological Reliabilism</b>	<b>243</b>
17.1	Reliabilism: The Reference Class Problem . . . . .	243
17.2	Grue, Bleen and the New Riddle of Induction . . . . .	244
17.3	Curve-fitting: The Problem of Mathematical Simplicity . . . . .	247
17.4	The Reliability of Simplicity as a Criterion of Truth . . . . .	248
17.5	The Incompatibility of Materialism and Scientific Realism . . . . .	249

17.5.1	The Pervasiveness of Simplicity . . . . .	251
17.5.2	The Centrality of Reliability to Representational Naturalism . . . . .	253
17.5.3	Proof of the Incompatibility . . . . .	255
17.5.4	Papineau and Millikan on Scientific Realism . . . . .	256
17.5.5	The Ramsey-Lewis Account of Laws . . . . .	258
17.6	When does Bayesian Learning Constitute Knowledge? . . . . .	261
17.7	Objective Chance and Empiricism . . . . .	263
