

Littlefield Fountain Operation During Commencement Week

Construction Will Pause for Photo Opportunities

May 8, 2008

Repair work on the Littlefield Fountain will pause during the week of May 12 through May 18 to allow photo opportunities before and during commencement ceremonies.

On Friday, May 9, the contractor will remove all construction fencing and debris from the site, and plant materials will be installed around the fountain. The Project Management and Construction Services Electric Shop and Facilities Services Zone 4 Shop will ensure operation of the lighting and fountain during the week.

The fountain will be shut down again on Monday, May 19, to allow the contractor to continue installing pumps, tanks and controls that operate the fountain and irrigation system. The work will be completed and final landscaping installed in late June 2008.
