DOCUMENTS OF THE GENERAL FACULTY

PROPOSED CHANGES TO THE BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCES IN THE JACKSON SCHOOL OF GEOSCIENCES IN THE UNDERGRADUATE CATALOG 2016-2018

Dean Sharon Mosher in the Jackson School of Geosciences has filed with the secretary of the Faculty Council the following changes to the Bachelor of Science in Environmental Sciences content common to Jackson School of Geoscience, College of Liberal Arts, and College of Natural Sciences in the Undergraduate Catalog, 2016-2018. The secretary has classified this proposal as legislation of general interest to more than one college or school.

The Committee on Undergraduate Degree Program Review recommended approval of the changes on November 5, 2015, and forwarded the proposal to the Office of the General Faculty. The Faculty Council has the authority to approve this legislation on behalf of the General Faculty. The authority to grant final approval on this legislation resides with UT System.

If no objection is filed with the Office of the General Faculty by the date specified below, the legislation will be held to have been approved by the Faculty Council. If an objection is filed within the prescribed period, the legislation will be presented to the Faculty Council at its next meeting. The objection, with reasons, must be signed by a member of the Faculty Council.

To be counted, a protest must be received in the Office of the General Faculty by January 26, 2016.

Hillary Hart, Secretary
General Faculty and Faculty Council

Posted on the Faculty Council website (http://www.utexas.edu/faculty/council/) on January 13, 2016.
PROPOSED CHANGES TO THE BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCES IN THE JACKSON SCHOOL OF GEOSCIENCES IN THE UNDERGRADUATE CATALOG 2016-2018

Type of Change  ☒ Academic Change  ☐ Degree Program Change (THECB form required)

Proposed classification  ☐ Exclusive  ☒ General  ☐ Major

1. IF THE ANSWER TO ANY OF THE FOLLOWING QUESTIONS IS YES, THE COLLEGE MUST CONSULT LINDA DICKENS, DIRECTOR OF ACCREDITATION AND ASSESSMENT, TO DETERMINE IF SACS-COC APPROVAL IS REQUIRED.

- Is this a new degree program?  ☐ Yes  ☒ No
- Does the program offer courses that will be taught off campus?  ☐ Yes  ☒ No
- Will courses in this program be delivered electronically?  ☐ Yes  ☒ No

2. EXPLAIN CHANGE TO DEGREE PROGRAM AND GIVE A DETAILED RATIONALE FOR EACH INDIVIDUAL CHANGE:

   The inclusion of new admissions language details the process whereby students seeking admission to the environmental science major are admitted as a single cohort, as was originally intended when the degree plans were created and approved by THECB. The language also specifies that students are permitted to confirm their selection of the 3 related environmental science degree plans after completing 24 hours in residence. This allows for a minimum introductory period in which students are expected to complete coursework common to all 3 degree plans, again as originally intended. Finally, the minimum grade point average to indicate competitiveness was raised from 2.75 to 3.00 and the coursework expected of internal transfer applicants was changed from mandatory to suggested in accordance with experience with the internal transfer process over the first 5 years of the program.

   Introductory paragraph (p. 271)
   Changes to the introductory paragraph to clarify that the major among all 3 degree plans is environmental science, and that biological, geographical, or geological sciences are majors within the degree.

   Prescribed work common to all colleges (p. 271)
   Change in field and research experience components were made in response to ongoing concerns about the quality of the research experience in both EVS 331 (previously Prescribed Requirement 9) and EVS 371 (previously Prescribed Requirement 8b). Specifically, the material previously addressed by EVS 331 was divided into two component parts. The first of these parts consisted of traditional Research Methods subjects, and was incorporated into a newly developed 1-credit hour course for environmental science majors (EVS 121), now listed as part of Prescribed Requirement 8. The remaining two credit hours, previously associated with a research project conducted in EVS 331, were reallocated to the capstone senior research experience, now listed as Prescribed Requirement 9. This change will allow students to spend more time focusing on, preparing for, and completing a single year-long (5-credit hour) research project (see Prescribed Requirement 9a). A year-long 5-credit hour course sequence was also created through which students can, under the supervision of a single faculty, work on related research projects collaboratively (see Prescribed Requirements 9b). Finally, the small number of students who still intend to complete one of a limited number of one-semester courses previously deemed satisfactory of the senior field experience requirement will be permitted to pair that course with either a smaller project under EVS 271 or an advanced course useful to but not explicitly required by their degree plan (see Prescribed Requirement 9c). It is the belief of the faculty advisors to the environmental science degree plans that this change will improve the overall quality of the research education of the environmental science students.

   Major requirements – BS, EVS: Geological Sciences (p. 272)
   Revised major requirements to address changes in departmental course offerings and remove references to unnumbered topics courses. Removal of Geological Sciences 404C from requirement #1 as this course will no longer be offered as a lower-division course. Its equivalent, Geological Sciences 405 will continue to be
offered in the fall and spring semesters and will remain in the major requirements. For major requirement #4, unnumbered topics course Geological Sciences 371C (approved topics) has been replaced with standalone courses that address climate and water that have been approved by EVS program faculty.

3. **THIS PROPOSAL INVOLVES (Please check all that apply)**
   - [x] Courses in other colleges
   - [ ] Courses in proposer’s college that are frequently taken by students in other colleges
   - [ ] Course in the core curriculum
   - [x] Change in admission requirements (external or internal)
   - [ ] Change in course sequencing for an existing program
   - [ ] Requirements not explicit in the catalog language (e.g., lists of acceptable courses maintained by department office)
   - [ ] Courses that have to be added to the inventory
   - [ ] Flags

4. **SCOPE OF PROPOSED CHANGE**
   - Does this proposal impact other colleges/schools? Yes [x] No [ ]
   - If yes, then how? This degree is jointly managed and awarded by 3 colleges: College of Natural Sciences, College of Liberal Arts, and Jackson School of Geosciences
   - b. Do you anticipate a net change in the number of students in your college? Yes [ ] No [x]
   - If yes, how many more (or fewer) students do you expect?
   - c. Do you anticipate a net increase (or decrease) in the number of students from outside of your college taking classes in your college? Yes [x] No [ ]
   - If yes, please indicate the number of students and/or class seats involved.
   - d. Do you anticipate a net increase (or decrease) in the number of students from your college taking courses in other colleges? Yes [x] No [ ]
   - If yes, please indicate the number of students and/or class seats involved.

If 4 a, b, c, or d was answered with yes, please answer the following questions. If the proposal has potential budgetary impacts for another college/school, such as requiring new sections or a non-negligible increase in the number of seats offered, at least one contact must be at the college-level.

How many students do you expect to be impacted? Approximately 160-180 environmental science majors across the College of Natural Science, the College of Liberal Arts, and the Jackson School of Geosciences.

Impacted schools must be contacted and their response(s) included:

Person communicated with: Dr. Carlos Ramos, Undergraduate Faculty Advisor, Liberal Arts
Date of communication: May 6, 2015
Response: Agreed

Person communicated with: Dr. Norma Fowler, Undergraduate Faculty Advisor, Natural Sciences
Date of communication: May 6, 2015
Response: Agreed

Person communicated with: Dr. Clark Wilson, Undergraduate Faculty Advisor, Geosciences
Date of communication: May 6, 2015
Response: Agreed

**e. Does this proposal involve changes to the core curriculum or other basic education requirements (42-hour core, signature courses, flags)?** No If yes, explain:
If yes, undergraduate studies must be informed of the proposed changes and their response included:
   Person communicated with:
   Date of communication:
   Response:
   f. Will this proposal change the number of hours required for degree completion?  No  If yes, explain:

5. COLLEGE/SCHOOL APPROVAL PROCESS
   Program approval date:  May 6, 2015
   Dean’s Scholars approval date (for changes to Option II):  N/A
   College approval date:  May 6, 2015

PROPOSED NEW CATALOG TEXT:

Admission to the Environmental Science Program

All freshmen and external transfer students majoring in environmental science (EVS) are first admitted to the University as entry-level EVS majors in the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences. After completing a minimum of 24 hours in residence, students may select the EVS major that best suits their long-term interests and, if necessary, transfer to the appropriate college/school in accordance with the regulations and procedures set forth in the General Information Catalog.

Freshman Admission

Freshmen applicants seeking admission to the EVS major through the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences must meet the calculus readiness requirement by the official admissions application deadline. More information about the calculus readiness requirement is available through the University Admissions Office or online.

Freshmen applicants to the EVS major from all three colleges/schools are reviewed and admitted as a single cohort. Applicants should use the ApplyTexas online application and select the “Environmental Science, Entry-Level” major option listed in the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences as a first-choice major. Applicants should apply to the EVS program in the college that best suits their anticipated area of focus (geological sciences, geographical sciences, or biological sciences, respectively).

External Transfer Admission

Students who wish to transfer to the University from another college or University must apply to the Office of Admissions as described in General Information. External transfer applicants seeking admission to the Environmental Science (EVS) Degree Program through the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences must demonstrate calculus readiness by the official admissions application deadline. Details regarding transfer calculus readiness are available through the University Admissions Office or online.

External transfer applicants to the EVS major from all three colleges/schools are reviewed and admitted as a single cohort. Applicants should use the ApplyTexas online application and select the “Environmental Science, Entry-Level” major option listed in the Jackson School of Geosciences, the College of Liberal Arts, or the College of Natural Sciences as a first-choice major. Applicants should apply to the EVS program in the college that best suits their anticipated area of focus (geological sciences, geographical sciences, or biological sciences, respectively).
Internal Transfer Admission
Internal transfer, entry-level applications submitted to the EVS major through the Jackson School of Geosciences, the College of Liberal Arts, and the College of Natural Sciences are reviewed and admitted as a single cohort. All internal transfer applicants should use the online EVS Program Transfer Application and must meet the requirements for internal transfer given in the General Information Catalog.

To be competitive for admission, internal transfer applicants should have a grade point average of at least 3.0 in Biology 311C, Chemistry 301, Mathematics 408C or 408N or 408K, and Geological Sciences 401 or 303.

Additional Information for all internal transfer applicants:
- Application Deadline: March 1st for entry the following academic year.
- Only currently enrolled students in good academic standing with their college of residence may apply.
- Students may apply during the semester they are completing the minimum requirements to be eligible for consideration.
- Entry-level admission to all Environmental Science majors is offered as space is available to the students who are best qualified. Decisions are based on the student’s grade point average in the introductory science and math courses listed above, University grade point average, and other factors including, but not limited to, difficulty of course load, course repetitions, proven mathematical ability, and interest in the field of Environmental Science.

Students should consult with an Academic Advisor for additional information on the application process and deadlines.

THE BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCE

The Bachelor of Science in Environmental Science degree program (BSEnviroSci), offered by the College of Liberal Arts, the College of Natural Sciences, and the Jackson School of Geosciences, is designed for students interested in an interdisciplinary scientific perspective on environmental and sustainability issues, analysis, and management. The degree program provides the broad foundation in physical, life, and social sciences needed for a career or graduate study in environmental science and related fields such as climate change, ecology, and conservation. Students who complete the program successfully will be able to assess environmental issues critically from multiple perspectives; perform field, laboratory, and computer analyses; and conduct original research. The program is designed to prepare graduates for careers in local, state, and federal government laboratories and nonprofit agencies, environmental consulting firms, environmental education and outreach agencies, and universities and other research settings. The degree is offered by the Jackson School with a major in geological sciences, by the College of Liberal Arts with a major in geographical sciences, and by the College of Natural Sciences with a major in biological sciences. The degree programs share common prescribed work, but each major has its own specific requirements. Students may earn only one Bachelor of Science in Environmental Science degree from the University.

Students must apply for admission to the degree program after completing prerequisite coursework. To be competitive for admission, students should have a grade point average of at least 2.75. More information about admission requirements is given in Admission to the Environmental Science Program.

The Bachelor of Science in Environmental Science BSEnviroSci curriculum consists of 126 semester hours of coursework. All students must complete the University’s Core Curriculum. The specific degree requirements consist of prescribed work, major requirements, and electives. In some cases, a course that is required for the degree may also be counted toward the core curriculum.

A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills any other requirement may also be used to fulfill a flag requirement if the course carries that flag, unless otherwise specified.
In the process of fulfilling the core curriculum and other degree requirements, all students are expected to complete the following [four areas] Skills and Experience flags:

1. Writing: two flagged courses beyond Rhetoric and Writing 306 or its equivalent; students in the College of Natural Sciences and the Jackson School of Geosciences must complete only two flagged writing courses. For students in the College of Natural Sciences, at least one writing flag must be from an upper-division course.
2. Quantitative reasoning: one flagged course
3. Global cultures: one flagged course
4. Cultural diversity in the United States: one flagged course
5. Ethics and leadership: one flagged course
6. Independent inquiry: one flagged course

Prescribed Work Common to All Environmental Science Majors

1. Mathematics: Mathematics 408C, or 408N and 408S, or 408K and 408L.
2. Chemistry: Chemistry 301 or 301H; 302 or 302H; and 204.
4. Biological Sciences: Biology 311C and 311D, or 315H.
5. Ecology: Biology 373 and 373L, or Marine Science 320 and 120L, or 152T (Topic: Marine Ecology) (Marine Science 320 may not be used to satisfy both requirement 5 and requirement 10.)
6. Ecology: a. Biology 373 or Marine Science 320. Marine Science 320 may not be used to satisfy both requirement 5a and requirement 10c. b. Biology 373L or Marine Science 120L. Environmental Science majors in the College of Natural Sciences must choose Biology 373L.
8. Geography: Geography 335N.
9. Field experience and research methods: One course from each of the following lists: Introductory field seminar: Environmental Science 311 and 121. Senior field/research experience: Environmental Science 371 or Biology 377 (with prior approval of the faculty adviser).
10. [Research methods: Environmental Science 331] Senior field/research experience: one of the following pairs: a. Environmental Science 271 and 371 or Environmental Science 171 and 471. b. Environmental Science 172C and 472D or Environmental Science 272C and 372D. c. Environmental Science 271 or Marine Science 348, and one of the following: Chemistry 320M, Geography 360G, 368C, 462K, Geosciences 327G, Mathematics 408D or 408M. Note: Geography 360G, 462K, and Geosciences 327G may not be used to satisfy both requirement 9c and 10b. Biology 277 may substitute for Environmental Science 271 with prior approval of the faculty advisor.
Major Requirements

BS EVS: Geological Sciences

The following thirty-six semester hours of coursework are required; these hours must include at least twelve hours of approved upper-division work in geological sciences.

1. Geological Sciences 404C or 405, 416K, 416M and 420K
2. Mathematics 408D or 408M
3. Four semester hours of physics in one of the following second semester sequences: Physics 316 and 116L, 317L and 117N, or 303L and 103N
4. One of the following courses on climate and water: Geological Sciences 347D, 347G, 371C (approved topics), 376E, 476K, 476M, 376S, 377P (The same course may not be used to satisfy both requirement 4 of the major requirements and requirement 10 of the prescribed work).
5. Nine additional semester hours of upper-division elective coursework in geological sciences not otherwise used to satisfy either prescribed or other major requirements.
6. Enough additional coursework to make a total of 126 semester hours.

Special Requirements

Students must fulfill the University-wide General Requirements (p. 17) and the Special Requirements (p. 266) of the Jackson School, and the Requirements for All Geological Sciences Degree Plans given earlier in this section. They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in General Information Catalog.
