Acknowledgements

The Mexico/United States Binational Study on Migration was a joint effort undertaken by twenty scholars from both countries who worked together in teams on five separate subject areas. The subject areas and team members are listed below. These researchers wrote background research papers and individual team reports, whose information and conclusions were collaboratively condensed and compiled into a joint summary report published under the title *The Binational Study on Migration Between Mexico and the United States*. The present three-volume publication contains the individual team reports (Volume 1) and background research papers and materials (Volumes 2 and 3) that were prepared as part of the Binational Study and that constitute the basis for the joint summary. We are appreciative of the efforts of the team members who, despite their different academic disciplines and subject area expertise, worked in a productive and collegial atmosphere. The summary report, the team reports, and the background papers all demonstrate the commitment of the binational members to producing a state-of-the art assessment of many aspects of Mexico-to-United States migration.

The Binational Study was funded by both the Mexican and United States governments in conjunction with private sector funding in both countries. This

structure was created to optimize the independence of the research teams and to make the final summary report immediately available to institutions interested in the critical role of migration in the bilateral relationship. The Mexican Ministry of Foreign Affairs funded the Study and, with the Ministry of Interior, supported the work of this Study. The U.S. Congress appropriated funds coordinated by the U.S. Commission on Immigration Reform, and both the U.S. Immigration and Naturalization Service and the Department of State made contributions. We also acknowledge funding received from the Consejo Nacional de Ciencia y Tecnología and the United States Information Service in Mexico. Private sector funders were very interested in the project. The Fundación Muguel Alemán in Mexico contributed and the Ford and the Hewlett Foundations in the United States also supported the entire project.

We are grateful for the data and information supplied to the Binational Study by government institutions in Mexico and the United States. We also appreciate the commissioned analyses prepared by Mexican and American consultants to the Study.

Finally, we acknowledge the many individuals in both countries who gave of their time and assisted the Study in gaining invaluable insights above and beyond the more mundane aspects of academic research. The Binational Study alternated its meeting sites between Mexico and the United States and visited several communities in both countries. Government officials were forthcoming in sharing information and hosting opportunities to learn in Mexico City, San Diego, Tijuana, Oaxaca, Washington, San Antonio, and Chicago. The members of the Binational Study especially appreciated the frank exchanges with community residents and migrants in Tijuana, Oaxaca, Guadalajara, and Chicago.

The publication of the present three-volume set did not occur before the U.S. Commission on Immigration Reform sunset on December 31, 1997. Publication was thus subsequently undertaken by the Mexican Migration and Policy Program of The University of Texas at Austin, a joint program of the Lyndon B. Johnson School of Public Affairs and the Population Research Center, under the supervision of Frank D. Bean. The three volumes and the joint summary are also currently available electronically from <http://www.utexas.edu/lbj/uscir>. Special thanks are owed to Anne Isenhower, without whose Herculean and well-organized efforts this project would not have been completed. José A. Arréllaga Acosta, Maria McGivney Arréllaga, Marlena Crusere, Eve Kleinman, Raquel Marquez, Nancy Meredith, Terry Sherrell, and Ruth Whinton also provided valuable assistance. Other members of the staff of both the LBJ School and the Population Research Center also helped in the publication of these volumes, for which the Binational Study wishes to express its gratitude.
