

SECTION 08336 – OVERHEAD COILING COUNTER SHUTTERS
CONSTRUCTION STANDARD

PART 1: GENERAL

1.01 Scope of Standard

- A. This standard provides general guidance concerning the specific preferences of the University of Texas at Austin for swing-up, sectional, paneled doors with operators, tracks, controls, etc.; includes operators and special hardware for upward acting doors.
- B. UT recognizes that project conditions and requirements vary, thus precluding the absolute adherence to the items identified herein in all cases. However, unless there is adequate written justification, it is expected that these guidelines will govern the design and specifications for UT projects.

1.02 Quality Control

- A. Type: Metal is preferred. Shutters shall be fire-rated when opening onto corridors.

1.03 General Requirements

- A. Operation: Motorized. Provide access to motor in the ceiling. Provide access at the jamb for the chain operation assembly.
- B. Fire rated: When in a fire rated assembly, the unit shall be rated appropriately. The unit shall be connected to the fire alarm system and shall not be a “release and gravity drop” type.
- C. Locking: Locking device shall be mechanical type.

PART 2: PRODUCTS – NOT USED

PART 3: EXECUTION – NOT USED

END OF STANDARD 08336
