

**SECTION 10651– OPERABLE PANEL PARTITIONS
CONSTRUCTION STANDARD**

PART 1: GENERAL

1.01 Scope of Standard

- A. This standard provides general guidance concerning the specific preferences of the University of Texas at Austin for folding, sliding or coiling partitions and walls.
- B. UT recognizes that project conditions and requirements vary, thus precluding the absolute adherence to the items identified herein in all cases. However, unless there is adequate written justification, it is expected that these guidelines will govern the design and specifications for UT projects.

1.02 Quality Control

- A. It is the standard of UT-Austin campus to discourage the use of these type systems. If however, approval for use is provided, design and installation must conform to structural requirements and also drywall partition sound attenuation assembly requirements between the top of the operable partition and the building's structural deck above.

PART 2: PRODUCTS – NOT USED

PART 3: EXECUTION – NOT USED

END OF STANDARD 10651
