

**SECTION 13120– PRE-ENGINEERED STRUCTURES
CONSTRUCTION STANDARD**

PART 1: GENERAL

1.01 Scope of Standard

- A. This standard provides general guidance concerning the specific preferences of the University of Texas at Austin for prefabricated, pre-engineered buildings and structures assembled on temporary or permanent foundations, such as greenhouses, solariums, swimming pool enclosures, etc.
- B. UT recognizes that project conditions and requirements vary, thus precluding the absolute adherence to the items identified herein in all cases. However, unless there is adequate written justification, it is expected that these guidelines will govern the design and specifications for UT projects.

1.02 Reference Standards

- A. Refer to the UT-Austin campus standard titled “ Pre-Engineered Metal Buildings” dated 5/14/98 for recommendations for the design, fabrication, and erection of pre-engineered metal buildings.

1.03 Quality Control

- A. Design and construction documents for pre-engineered metal buildings shall be prepared and sealed by a structural engineer, registered in the State of Texas, familiar with local codes and design conditions. Design data and loading shall be clearly stated on structural documents.

PART 2: PRODUCTS – NOT USED

PART 3: EXECUTION – NOT USED

END OF STANDARD 13120
