### ABSTRACT

Chem 1 is an introductory chemistry course for non-majors offered through The University of Texas at Austin Chemistry Department and The University of Texas Telecampus. Chem 1 is delivered completely *via* the Internet. Chem 1 students receive the same 3 credits as those students in traditional intro chemistry courses at UT. The content of Chem 1 covers the first 12 chapters of *General Chemistry* by Whitten, Davis, and Peck. The course is NOT self- paced in the usual sense of the word, as there is a strict deadline for each chapter, by which all chapter assignments must be completed. However, within the confines of that due date, the student is free to complete lectures and assignments at his/ her leisure.
