

The University of Texas  
School of Social Work  
Summer 2005

Instructor: Arlene Montgomery, Ph.D., LCSW  
Course Number: SW N393R1  
Unique Number: 96230  
Meeting Time and Place: SSW MONDAY/WEDNESDAY 5:30-8:30, Room 2.112  
Phone: Home (512) 480-8086; Office (512) 474-8317

Email: YERZABORZOI @ AOL.COM  
(NOT TO BE USED FOR SUBMITTING ASSIGNMENTS)  
Office Hours: By appointment

## CLINICAL ASSESSMENT AND DIFFERENTIAL DIAGNOSIS

### **I. Course Description**

This course will focus on the incidence, etiology, and assessment of dysfunctional behavior patterns with children, adolescents, adults, and families. Students will learn models of assessment to evaluate human functioning throughout the life cycle, with emphasis on vulnerable and diverse populations. Major nosological systems, such as Diagnostic and Statistical Manual of Mental Disorders and the International Classification of Diseases, and other schemes for assessing and understanding human behavior, will be covered.

This course is required of MSSW students in the Clinical Concentration.

## Course Objectives

By the end of the semester, students will be able to do the following:

- a. demonstrate familiarity with biological, psychosocial, and cultural theories on the etiology of dysfunctional behavior patterns;
- b. demonstrate the ability to apply multiple methods of assessment, including those developed through classificatory schemes, standardized measures, and qualitative typologies;
- c. describe the relationship between assessment and intervention in social work practice;
- d. demonstrate the ability to adapt assessment models to reflect the needs of persons of diverse social, economic, cultural, or ethnic backgrounds, including understanding issues of gender, sexual orientation, and ability;
- e. critically evaluate different theoretical and assessment models as to their efficacy in given situations. This includes the following:
  - i. the adequacy of the research and knowledge
  - ii. the range of applicability
  - iii. the value and ethical issues
  - iv. the policy implications involved in assessment and delivery of service assessment and delivery of services
- f. demonstrate an understanding of the limitations in using the classification schemes in understanding human behavior and the danger of mislabeling people, particularly those from at risk populations.

## II. Teaching Methods

The methods include lecture, discussion, experiential exercises, group presentation, guest clinicians demonstrating clinical interviewing skills, clinical cases, and video materials.

## III. Required and Optional Texts/Materials

Required material: American Psychiatric Association. (2000). *Diagnostic and statistical manual of mental disorders, Fourth Edition Text Revision (DSM- IV -TR)*. Washington, DC: Author.

Buelow, H., Hebert, S. & Buelow. S. (2000). *Psychotherapist's resources on psychiatric medications: Issues of treatment and referral (2<sup>nd</sup> ed.)* Belmont, CA: Brooks/Cole.

Course packet available for purchase at I.T. Copy, I.T. Printing, 214 W. MLK Blvd., 476-6662.

#### **IV. Course Requirements: Attendance & Participation, Special Accommodations, Assignments, Policy on Scholastic Dishonesty, and Grading**

##### **Attendance**

Students are expected to attend all classes; this is particularly important as the experiential component is critical to learning the material. Should a student have to be absent, please communicate with the instructor prior to the class, if possible. One unexcused absence will be permitted; any other unexcused absences will result in a deduction from the final grade. Late material may also result in deduction in points, depending on the circumstances.

##### **Special Accommodations for Students with a Disability**

In compliance with the Rehabilitation Act of 1973 (Section 504) and the Americans with Disabilities Act, the instructor is available to discuss appropriate academic accommodations with the student. Students with disabilities who need special accommodations should notify the instructor at the beginning of the semester. To insure that the most appropriate accommodations can be provided, students should contact the Services for Students with Disabilities (SSD) Office at 471-6259 or 471-4641 TTY.

##### **Course Assignments**

**There will be 7 worksheets (primarily done together either with fellow class-mates or in class); a cumulative mid-term examination and a non-cumulative final examination; a group presentation which includes a handout for classmates (summary of important points from assigned clinical articles and from the texts); a discussion of clinical issues from the assigned video with film clips to illustrate important points from the assigned material and a one page reaction paper; and a 3-5 page critique addressing assessment issues for the role play clinical interviews.**

**At least 85% of the material on the exams will be taken from the preceding worksheets, in-classes worksheets and quizzes, and summarized material from presentations.**

## Panel Presentation

The instructor will provide 1 copy to the class of the videos; they can also be rented in video stores and many are available in the Undergraduate Library on the 3rd floor. There will be exam questions about examples on the videos which would be difficult to answer correctly without having seen the videos. Every student is expected to watch the film outside of class and be prepared to discuss film illustrations as it is related to the assigned material.

The class will be led in a discussion of clinical material illustrated by clips from films such as WHAT'S EATING GILBERT GRAPE; LIKE WATER FOR CHOCOLATE, TAXI DRIVER, FATAL ATTRACTION, AS GOOD AS IT GETS, AND SYBIL. Each student panel will lead a discussion of the videos as they illustrate certain technical material from the texts and other assigned material.

The role play will be of a character or characters from the films that illustrate the assessment process of the clinical unit of attention, such as a couple, individual, or family as well as the diagnostic entities. The role play will be conducted by a professional Clinical Social Worker; students may volunteer to conduct the interview if they wish, but this is not a requirement.

Each panel will summarize **briefly** the clinical points in material assigned to their particular video. Each classmate will be provided with a copy of the summaries. *The purpose of the summary is to provide an outline for the discussion. The panel is expected to have mastered those points in order to integrate the material in a class discussion.* Note: the assigned material from the DSM- IV -TR should not be outlined in detail; further instructions will be provided on the first class day.

### **The presentation should include the following:**

Examples from movie illustrating

- a. from 6-10 defenses (10%)
- b. examples of at least 2 ethical dilemmas, as defined by NASW Code of Ethics(2%)
- c. where relevant in the assigned film material, identify ways such factors as age, class, culture, race, ethnicity, country of origin, language(s), educational attainment, religious back ground, sexual orientation, clinician value conflict and/or physical disability may influence (limit, compromise, or enhance) the clinical diagnostic effort and the diagnosis (4%)
- d. the effect of trauma and economic and social oppression on the diagnostic process and on the diagnosis (5%)
- e. a brief critique of a research question generated by the effort to diagnosis a film figure (1%)
- f. psychometric measurement tool(1%){ each panel will discuss with instructor }
- g. preparation for role play and one page reaction paper (4%)

{ the reaction paper is intended to reflect the student's educational experience of the panel presentation; details given first class day)

## **Paper**

The 5 page paper will discuss one of the role play experiences, including a providing a Multiaxial Assessment (5%) of one the interviewees and is to include the following:

- a. a brief discussion of the assessment of the client systems with a sample of the client's interpersonal behavior and emotional processes that can either support or qualify inferences from the history and examination (make an inference)(2%)
- b. information such as the following: ways the client(s) minimize(s) or exaggerate(s) certain aspects of his or her history, particular topics/questions that evoke hesitation or signs of discomfort, and the general style of relating (1%)
- c. client's ability to communicate about emotional issues (1%)
- d. examples of 4 defense mechanisms utilized including examples of **one** of the following for each defense: the coping style, the function, inferred cognition, and the diagnostic language (1.5%)
- e. 4 examples from the clinical interview that contained 4 of elements of a mental status exam (1.5)
- f. An error made by the clinician with the correction from the assigned literature (.5%)
- g. And example of your personal reaction to the interview that could include a value conflict, ethical concern, and/or counter-transference reaction (.5%)

## **Policy on Scholastic Dishonesty**

**Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and/or dismissal from the University. Since such dishonesty harms the individual, all students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced. For further information, the student may refer to the Web Site of the Student Judicial Services, Office of the Dean of Students (<http://dean of students.utexas.edu/sjs/academicintegrity.html>).**

## Grading

Per cent of final grade

25%	Group Presentation, role play, and summaries
28%	Seven worksheets
17%	Examination #1
17%	Examination #2
13%	Paper

90-100 = A
80-89 = B
70-79 = C
60-69 = D
Below 60 = F

June 6, Monday

Illustrations of course requirements utilizing the film, **Ponette**.

**Lecture:** an introduction to psychopathology including neurological issues, clinical assessment, history of theoretical influence on clinical social work and ethics as found in the NASW Code of Ethics

**Text:**

Introduction of DSM-IV-TR (xxiii-xxxv); 13-37; Defensive Functioning Scale (807-810); and Glossary of Specific Defense Mechanisms and Coping Styles (811-813); GARF Scale (814); SOFAS Scale (817); Glossary of Technical Terms (819-828)
