Post Test Analysis

Write the number of the questions you missed in the left column.
Enter the number of points you lost for that question in the second column
Decide why you lost points for that question and check off those that apply. If there was some other reason you lost points, describe that in the “Other” column.
On the back, come up with a game-plan for your next exam: What specific things can you do differently before or during the next exam?

#	Number of Points Lost	I missed a detail or made a careless error	I did not study this concept well enough to answer the question	I did not understand this concept well enough to answer the question	I misinterpreted the question or did not understand the question	Other (describe)
