

Discovery Drawers: Who Am I?

Use the *Discovery Drawers* located by the *Paleo Lab* to find answers to the clues below.

Hint: Find the drawers with the green labels to help you locate the correct answer.

 I live on *oyster banks*. I use my claws to search through sand and rocks to find my food.

Who am I? _____

 I am the remains of trees living millions of years ago that were turned into stone.

Who am I? _____

 I am a rock from outer space that fell to Earth.

Who am I? _____

 I live in the ocean and have an *odd* way of trapping food with my 5 arms.

Who am I? _____

 People know me best for the shiny pearls they sometimes find hiding in my shell.

Who am I? _____

 I'm not really a *monster*, but crawled along the ancient sea floor and scavenged for my food.

Who am I? _____

 I am a type of rock that formed deep underground. I can be found at Enchanted Rock State Natural Area.

Who am I? _____

 I am a relative of octopuses and squids. I lived in the ancient ocean that covered Central Texas during the Cretaceous Period. You can find my tightly coiled shell preserved as fossils around Austin.

Who am I? _____

 I am a type of insect that has been around for over 300 million years! I can often be found near streams, creeks, ponds and lakes.

Who am I? _____

 Some people may think it's *weird* that I cement the shells of other animals to my shell.

Who am I? _____
